International Practice Development in Health and Social Care Aug 19 2022 International Practice Development in Health and Social Care International Practice Development in Health and Social Care The second edition of International Practice Development in Health and Social Care remains the definitive resource for all those responsible for facilitating innovation and change in health and social care practice at every level. Fully revised and updated throughout, this new edition preserves its focus on developing person-centred, safe and effective evidence-based care that reflects the most recent health service modernisation agendas, clinical governance strategies, and quality improvement initiatives worldwide. Designed to empower multi-professional healthcare teams to transform both the culture and context of care, this invaluable guide: Offers an accessible, interactive approach to a variety of complementary improvement approaches that integrate learning, development, improvement, knowledge translation and inquiry Delivers practical practice development (PD) strategies guided by values of compassion, safety, efficacy, and person-centredness Provides recommendations for prioritising wellbeing in the workplace, enabling team effectiveness, and fostering collaboration and inclusion across health and social care systems Includes numerous real-world examples that connect theory with practice and illustrate field-tested PD methods Features contributions from Australia, Scandinavia, the UK, Germany, New Zealand, and the Netherlands, underscoring the text's international focus International Practice Development in Health and Social Care is essential reading for multi-professional healthcare practitioners including nurses, midwives, allied healthcare and medical practitioners, clinical educators, PD coordinators, health and social care leaders, managers and commissioners, and students and trainees from all the healthcare professions.

Blue Ocean Leadership (Harvard Business Review Classics) Nov 10 2021 Ten years ago, world-renowned professors W. Chan Kim and Renee Mauborgne broke ground by introducing "blue ocean strategy," a new model for discovering uncontested markets that are ripe for growth. In this bound version of their bestselling Harvard Business Review classic article, they apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and the realized talent and energy of employees. Research indicates that this gulf is vast: According to Gallup, 70% of workers are disengaged from their jobs. If companies could find a way to convert them into engaged employees, the results could be transformative. The trouble is, managers lack a clear understanding of what changes they could make to bring out the best in everyone. In this article, Kim and Mauborgne offer a solution to that problem: a systematic approach to uncovering, at each level of the organization, which leadership acts and activities will inspire employees to give their all, and a process for getting managers throughout the company to start doing them. Blue ocean leadership works because the managers' "customers"--that is, the people managers oversee and report to--are involved in identifying what's effective and what isn't. Moreover, the approach doesn't require leaders to alter who they are, just to undertake a different set of tasks. And that kind of change is much easier to implement and track than changes to values and mind-sets. The Harvard Business Review Classics series offers you the opportunity to make seminal Harvard Business Review articles a part of your permanent management library. Each highly readable volume contains a groundbreaking idea that continues to shape best practices and inspire countless managers around the world--and will have a direct impact on you today and for years to come.

The Effects of High Pressure, High Temperature Hydrogen on Steel Apr 03 2021 This report deals with the deleterious effects of

hydrogen gas on steel at elevated temperatures and/or pressures. Hydrogen attack on steels is manifest as decarburization, intergranular fissuring, or blistering. These conditions result in lowered tensile strength, ductility, and impact strength. The reaction of hydrogen with iron carbide to form methane is probably the most important chemical reaction involved in the attack on steel by hydrogen. Attack of steel at elevated temperatures and pressures is limited or prevented by the following measures: (1) use of steel alloyed with strong carbide-forming elements, (2) use of liners of resistant alloy steels, and (3) substitution of resistant nonferrous alloys.

Homelessness Prevention and Intervention in Social Work May 24 2020 This important text provides a comprehensive survey of homelessness in America: its scope and causes, its diverse populations, and the array of responses at the individual, community, and systems levels. Expert contributors explore the links between trauma and homelessness, the cycle of homelessness and health/mental health problems, and barriers preventing people from accessing services. Case studies of effective programs and practices focus on science-based interventions, broad understanding of client needs, and close coordination between systems and agencies. Finally, specialized chapters discuss issues and experiences common to homeless youth and young adults, including housing instability on college campuses and empowerment-based strategies for engaging youth voice in programming. Included in the coverage: Homelessness and health disparities: a health equity lens Affordable housing and housing policy responses to homelessness Street talk: homeless discourses and the politics of service provision Multisectoral collaborations to address homelessness Trauma-informed care in homelessness service settings: challenges and opportunities Incorporating youth voice into services for young people experiencing homelessness Homelessness Prevention and Intervention in Social Work fills a critical gap in the social work curriculum as a main or a supplementary text. It also makes an accessible resource for clinicians and community practitioners seeking current knowledge on the topic, practical approaches to working with clients experiencing homelessness, and useful information for effective program and policy design.

Chinese Arbitration Law Sep 20 2022 This title focuses on the law and practice of arbitration in China. It deals with the whole range of China practice issues from pre-commencement considerations and interim remedies to jurisdictional challenges to practice and procedure to the enforcement of awards. It also contains guidance on the emerging and important area of China related investment treaty disputes.

Innovations in Ventilative Cooling Nov 17 2019 This book includes the most recent outcomes from research and professional practice in the ventilative cooling field, gathered by the selected panel of authors. It provides essential contents to face and reduce the rise of space cooling and ventilation energy uses in buildings by alternative ventilation and cooling solutions. The book is organised into three parts which include a detailed description of ventilative cooling boundaries and implications (working principles, KPIs, standards, comfort models, control techniques) and of principal techniques (night ventilation, controlled natural ventilation, hybrid solutions, PCM and mass activation, evaporative cooling, earth-to-air heat exchangers) along with an updated analysis of the background to the topic. Furthermore, the last part of the book defines a unique practical and theoretical framework to include ventilative cooling solutions in different building typologies along with their principal implications.

Trekking the Tour of Mont Blanc Dec 11 2021 This guidebook contains in-depth route description and mapping for both the classic 11 day anti-clockwise circuit and an alternative 10 day clockwise TMB circuit. This well-signed but demanding 170km route, starting from Les Houches or Champex, is suitable for fit walkers. The guidebook comes with a map booklet containing official 1:25,000 IGN mapping for the TMB route, and urban maps for the major centres of Chamonix, Courmayeur, Les Contamines, Les Houches and Champex. Complete with a French-English glossary, comprehensive notes about accommodation, facilities and transport, this guide provides all the information needed for planning and completing your trek. The Tour of Mont Blanc is one of the world's classic treks. Visiting France, Italy and Switzerland, the TMB passes through some of Europe's most spectacular mountain scenery, with views of the peaks and glaciers of the magnificent Mont Blanc massif.

Engineering Optimization Oct 17 2019 A Rigorous Mathematical Approach To Identifying A Set Of Design Alternatives And Selecting The Best Candidate From Within That Set, Engineering Optimization Was Developed As A Means Of Helping Engineers

To Design Systems That Are Both More Efficient And Less Expensive And To Develop New Ways Of Improving The Performance Of Existing Systems. Thanks To The Breathtaking Growth In Computer Technology That Has Occurred Over The Past Decade, Optimization Techniques Can Now Be Used To Find Creative Solutions To Larger, More Complex Problems Than Ever Before. As A Consequence, Optimization Is Now Viewed As An Indispensable Tool Of The Trade For Engineers Working In Many Different Industries, Especially The Aerospace, Automotive, Chemical, Electrical, And Manufacturing Industries. In Engineering Optimization, Professor Singiresu S. Rao Provides An Application-Oriented Presentation Of The Full Array Of Classical And Newly Developed Optimization Techniques Now Being Used By Engineers In A Wide Range Of Industries. Essential Proofs And Explanations Of The Various Techniques Are Given In A Straightforward, User-Friendly Manner, And Each Method Is Copiously Illustrated With Real-World Examples That Demonstrate How To Maximize Desired Benefits While Minimizing Negative Aspects Of Project Design. Comprehensive, Authoritative, Up-To-Date, Engineering Optimization Provides In-Depth Coverage Of Linear And Nonlinear Programming, Dynamic Programming, Integer Programming, And Stochastic Programming Techniques As Well As Several Breakthrough Methods, Including Genetic Algorithms, Simulated Annealing, And Neural Network-Based And Fuzzy Optimization Techniques. Designed To Function Equally Well As Either A Professional Reference Or A Graduate-Level Text, Engineering Optimization Features Many Solved Problems Taken From Several Engineering Fields, As Well As Review Questions, Important Figures, And Helpful References. Engineering Optimization Is A Valuable Working Resource For Engineers Employed In Practically All Technological Industries. It Is Also A Superior Didactic Tool For Graduate Students Of Mechanical, Civil, Electrical, Chemical And Aerospace Engineering.

*Inorganic Chemistry in Focus III Apr 15 2022 Metal clusters are on the brink between molecules and nanoparticles in size. With molecular, nano-scale, metallic as well as non-metallic aspects, metal clusters are a growing, interdisciplinary field with numerous potential applications in chemistry, catalysis, materials and nanotechnology. This third volume in the series of hot topics from inorganic chemistry covers all recent developments in the field of metal clusters, with some 20 contributions providing an in-depth view. The result is a unique perspective, illustrating all facets of this interdisciplinary area: * Inter-electron Repulsion and Irregularities in the Chemistry of Transition Series * Stereochemical Activity of Lone Pairs in Heavier Main Group Element Compounds * How Close to Close Packing? * Forty-Five Years of Praseodymium Diodide * Centered Zirconium Clusters * Titanium Niobium Oxychlorides * Trinuclear Molybdenum and Tungsten Cluster Chalcogenides * Current State of (B,C,N)-Compounds of Calcium and Lanthanum * Ternary Phases of Lithium with Main-Group and Late-Transition Metals * Polar Intermetallics and Zintl Phases along the Zintl Border * Rare Earth Zintl Phases * Structure-Property Relationships in Intermetallics * Ternary and Quaternary Niobium Arsenide Zintl Phases * The Building Block Approach to Understanding Main-Group-Metal Complex Structures * Cation-Deficient Quaternary Thiospinels * A New Class of Hybrid Materials via Salt Inclusion Synthesis * Layered Perrhenate and Vanadate Hybrid Solids * Hydrogen Bonding in Metal Halides * Syntheses and Catalytic Properties of Titanium Nitride Nanoparticles * Solventless Thermolysis * New Potential Scintillation Materials in Borophosphate Systems. With its didactical emphasis, this volume addresses a wide readership, such that both students and specialists will profit from the expert contributions.*

From Sources to Solution Jun 24 2020 Featuring the theme, From Sources to Solution, this book is based on the research papers presented during the International Conference on Environmental Forensics 2013. It covers multi-disciplinary areas of environmental forensics featuring major themes: characterization, assessment, and monitoring; new approach, rapid assessment, and analytical techniques; pollution control technology; environmental health risk assessment; and policy, governance and management. It present information for researchers from the science and social sciences disciplines and contribute to the advancement of Environmental Forensics. It also aims at evaluating the environmental damages as the result of indiscriminating discharge of toxic environmental pollutants.

Business Model Shifts Jun 17 2022 Shift your business model and transform your organization in the face of disruption Business Model Shifts is co-authored by Patrick van Der Pijl, producer of the global bestseller Business Model Generation, and offers a groundbreaking look at the challenging times in which we live, and the real-world solutions needed to conquer the obstacles organizations must now face. Business Model Shifts is a visually stunning guide that examines six fundamental disruptions happening now and spotlights the opportunities that they present: The Services Shift: the move from products to services The Stakeholder Shift: the move from an exclusive shareholder orientation to creating value for all stakeholders, including employees and society The Digital Shift: the move from traditional business operations to 24/7 connection to customers and their needs The Platform Shift: the move from trying to serve everyone, to connecting people who can exchange value on a proprietary platform The Exponential Shift: the move from seeking incremental growth to an exponential mindset that seeks 10x growth The Circular Shift: the move from take-make-dispose towards restorative, regenerative, and circular value creation Filled with case studies, stories, and in-depth analysis based on the work of hundreds of the world's largest and most intriguing organizations, Business

Model Shifts details how these organizations created their own business model shifts in order to create more customer value, and ultimately, a stronger, more competitive business. Whether you're looking for ways to redesign your business due to the latest needs of the marketplace, launching a new product or service, or simply creating more lasting value for your customers, *Business Model Shifts* is the essential book that will change the way you think about your business and its future.
