Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Multiple sclerosis (MS) is a complex disease with a presumed autoimmune aetiology and few current effective treatments. Disease modifying therapies focus on the altering the natural course of relapsing and remitting MS, targeting the inflammatory response. Other targets involve tacking the cause of the disease – demyelination of axons through remyelination therapies. Due to several recent breakthroughs in the understanding of the pathophysiology of MS new targets for remyelination and immunomodulation are rapidly emerging. This book provides a comprehensive overview of drug discovery and development for the molecular basis of the disease, from new targets to drugs currently in clinical development, cellular and animal disease models to biomarkers for diagnosis and assessment in clinical trials. **Emerging Drugs and Targets for Multiple Sclerosis** is an ideal reference for any student or researcher interested in drug development for neurodegenerative diseases, autoimmune diseases and MS in particular. This book examines the power transition between the US and China, and the implications for Europe and Asia in a new era of uncertainty. The volume addresses the impact that the rise of China has on the United States, Europe, transatlantic relations, and East Asia. China is seeking to use its enhanced power position to promote new ambitions; the United States is adjusting to a new superpower rivalry; and the power shift from the West to the East is resulting in a more peripheral role for Europe in world affairs. Featuring essays by prominent Chinese and international experts, the book examines the US-China rivalry, the changing international

system, grand strategies and geopolitics, foreign policy, geo-economics and institutions, and military and technological developments. The chapters examine how strategic, security, and military considerations in this triangular relationship are gradually undermining trade and economics, reversing the era of globalization, and contributing to the breakdown of the US-led liberal order and institutions that will be difficult to rebuild. The volume also examines whether the adversarial antagonism in US–China relations, the tension in transatlantic ties, and the increasing rivalry in Europe–China relations are primarily resulting from leaders’ ambitions or structural power shifts. This book will be of much interest to students of Asian security, US foreign policy, European politics, and International Relations in general.
