Northwest Territories Personal Income Tax Oct 15 2021 Oct 15 2021 This is the report of a committee formed in May 2001 to provide recommendations on how the tax on income system can best serve the Northwest Territories. It first explains the benefits of converting the existing system of tax on federal tax to tax on income, and sets out principles for analyzing the personal income tax system. It then analyzes three tax options (a graduated tax, a flat tax, and a competitive tax), discusses options related to tax credits, and presents a brief comparison of other provinces. The final section presents the committee's recommendations.

Dual Income Tax Aug 25 2022 Aug 25 2022 In its Annual Report 2003/2004, the German Council of Economic Experts launched a dual income tax as an option for a fundamental tax reform in Germany. In February 2005 the German government appointed the Council to prepare a detailed report on economic effects of a business tax reform, with special emphasis on dual income tax. With regard to the latter, conceptual problems of

law and of tax administration were to be addressed as well as possible transitional problems when implementing a dual income tax. This book presents an English version of the original report completed in April 2006.

Do Personal Taxes Affect Capital Structure **Oct 27 2022** Because the personal tax treatments of interest and dividend income likely affect the relative cost of debt and equity financing, a sharp change in tax treatment could affect firms' optimal leverage. This paper examines the effect of the 2003 equity income tax cut on firms' debt usage. Because this tax cut affected only individual investors, we can use a difference-in-differences method to identify the effect of personal tax on firms' leverage. Previous research has found that the 2003 tax cut encouraged dividend payments and reduced the cost of equity, but it provides no link to equilibrium leverage ratios. We estimate that the tax cut causes the affected

leverage to decrease by about 5 percentage points. Furthermore, show that the effects of the tax cut are stronger for firms with high marginal corporate tax rates and for firms that are not financially constrained, consistent with our theoretical predictions. Overall, we have strong evidence that personal tax is an important determinant of optimal leverage.
