The Cat Encyclopedia Jun 11 2021 This encyclopedia highlights more than 50 different cats. Alongside colorful photographs of both adult cats and kittens, readers learn about the history, appearance, and behavior of various breeds. Features include information about cat care, a glossary, additional resources, and an index. Aligned to Common Core Standards and correlated to state standards. Abdo Reference is an imprint of Abdo Publishing, a division of ABDO.

Nature's Deadliest Creatures Visual Encyclopedia May 11 2021 Come face-to-face with 150 of the world's scariest killer creatures, from the lion and great white shark to the tarantula, anaconda snake, golden eagle, vampire bat, and even the fierce ant! The ebook profiles every kind of animal--mammals, reptiles, birds, fish, insects, and arachnids. Chapters are arranged according to how these dangerous predators kill. Do they use jaws and claws, venom, stings, traps, tricks and cunning, or mass invasion? With more than 200 spectacular photos in the ebook, every page has a stunning image of the animal in action, with data files giving a visual e-guide to its size, distribution, diet, and habitat, as well as a rating of its "scare factor." Each profile features bite-size text that will appeal to all readers. Discover key facts about how the animal lives (is it solitary or a pack animal?), intriguing anatomy (the platypus is famously one of the few venomous mammals, but did you know that the venom comes from the hind leg on the males only?), and of course, their method of attack (such as chasing prey to exhaustion, launching an ambush, or paralyzing with poison). Further fascinating facts can also be found in the reference section, including deadly defense, family trees, toxins, and prehistoric deadly creatures that are no more.

Occupational Outlook Handbook Mar 09 2021

Science Encyclopedia Aug 14 2021 Offers an illustrated encyclopedia of general science, with informative and fun facts on a broad array of scientific topics.

The Complete Book of Animals Feb 26 2020 "This is a world encyclopedia of amphibians, reptiles and mammals with over 500 detailed illustrations. This is a fully illustrated encyclopedia of over 350 amphibians, reptiles and mammals from the world. It includes the venomous western diamondback rattlesnake of the southern United States; the tree-dwelling flying lizard of South-east Asia, the extraordinary egg-laying platypus of Australia. This is a natural history guide that focuses on how animals have adapted in terms of anatomy, senses and survival skills, and describes the varied habitats in which animals live. This is a fabulous, accessible natural history reference for both families and schools. The first section of this incredible illustrated reference book focuses on the diversity of life in the animal kingdom, looking at the habitats in which animals live and how they survive. It also includes a guide to a mphibian, reptilian and mammalian anatomy and senses. The rest of the book is divided into three chapters, each focusing on a different area of the world: the Americas; Europe and Africa; and Asia, Australia and New Zealand. Each animal is accompanied by a colour illustration and a specification panel giving information about distribution, habitat, food, size, maturity, breeding, life span and more. With over 900 magnificent colour illustrations and photographs, and packed with fascinating facts, this book is a must-have family reference for anyone interested in wild animals, where they live and how they survive."--Publisher's description.

Native Peoples of the Plains Feb 05 2021 A long time ago, before the Plains region of the United States was divided up into states such as Nebraska, Colorado, and Wyoming, this land was home to American Indians. Twenty-eight unique Indian nations built homes and gathered food in the Plains. They spoke distinct languages, set up political systems, and made art. They used the natural resources available in their region in order to thrive. • The Wichita lived in houses made of grass. From the outside, they looked like giant haystacks. • Omaha and Ponca people wore caps made from eagleskin. • Lakota men carved flutes to play songs for the girls they hoped to marry. Many American Indians still live in the Plains region. Explore the history of these various nations and find out how their culture is still alive today.

Space A Visual Encyclopedia May 23 2022 From the Moon, Sun, and planets of our Solar System to space exploration, black holes, and dark matter, this completely revised and updated children's encyclopedia covers all you need to know about the cosmos. This absolute must-have book is the ideal gift for young people keen to know about everything and anything.

Encyclopedia of Geographic Information Science Apr 29 2020 Geographic information science (GIScience) is an emerging field that combines aspects of many different disciplines. Spatial literacy is rapidly becoming recognized as a new, essential pier of basic education, alongside grammatical, logical and mathematical literacy. By incorporating location as an essential but often overlooked characteristic of what we seek to understand in the natural and built environment, geographic information science (GIScience) and systems (GISystems) provide the conceptual foundation and tools to explore this new frontier. The Encyclopedia of Geographic Information Science covers the essence of this exciting, new, and expanding field in an easily understood but richly detailed style. In addition to contributions from some of the best recognized scholars in GIScience, this volume contains contributions from experts in GIS' supporting disciplines who explore how their disciplinary perspectives are expanded within the context of GIScience--"what changes when consideration of location is added, what complexities in analytical procedures are added when we consider objects in 2, 3 or even 4 dimensions, what can we gain by visualizing our analytical results on a map or 3D display? Key Features Brings together GIScience literature that is spread widely across the academic spectrum Offers details about the key foundations of GIScience, no matter what their disciplinary origins Elucidates vocabulary that is an amalgam of all of these fields Key Themes Conceptual Foundations Cartography and Visualization Design Aspects Data Manipulation Data

Modeling Geocomputation Geospatial Data Societal Issues Spatial Analysis Organizational and Institutional Aspects The Encyclopedia of Geographic Information Science is an important resource for academic and corporate libraries.
