Winner of the 2017 Wainwright Golden Beer Book Prize for nature writing The natural history of the Western Front during the First World War 'If it weren't for the birds, what a hell it would be.' During the Great War, soldiers lived inside the ground, closer to nature than many humans had lived for centuries. Animals provided comfort and interest to fill the blank hours in the trenches - bird-watching, for instance, was probably the single most popular hobby among officers. Soldiers went fishing in flooded shell holes, shot hares in no-man's land for the pot, and planted gardens in their trenches and billets. Nature was also sometimes a curse - rats, spiders and lice abounded, and disease could be biblical. But above all, nature healed, and, despite the bullets and blood, it inspired men to endure. Where Poppies Blow is the unique story of how nature gave the British soldiers of the Great War a reason to fight, and the will to go on. Raymond Briggs' now famous bestselling comic cartoon book depicts the effects of a nuclear attack on an elderly couple in his usual humorous yet macabre way. A practical and comprehensive guide to surviving the greatest disaster of our time, from New York Times bestselling self-help author and beloved CBS Sunday Morning science and technology correspondent David Pogue. You might not realize it, but we're already living through the beginnings of climate chaos. In Arizona, laborers now start their day at 3 a.m. because it's too hot to work past noon. Chinese investors are snapping up real estate in Canada. Millennials have evacuation plans. Moguls are building bunkers. Retirees in Miami are moving inland. In How to Prepare for Climate Change, bestselling self-help author David Pogue offers sensible, deeply researched advice for how the rest of us should start to ready ourselves for the years ahead. Pogue walks readers through what to grow, what to eat, how to build, how to insure, where to invest, how to prepare your children and pets, and even where to consider relocating when the time comes. (Two areas of the country, in particular, have the requisite cool temperatures, good hospitals, reliable access to water, and resilient infrastructure to serve as climate havens in the years ahead.) He also provides wise tips for managing your anxiety, as well as action plans for riding out every climate catastrophe, from superstorms and wildfires to ticks and epidemics. Timely and enlightening, How to Prepare for Climate Change is an indispensable guide for anyone who read The Uninhabitable Earth or The Sixth Extinction and wants to know how to make smart choices for the upheaval ahead. The Scallywags are a band of unruly wolves who find it hard to behave properly. But after they storm out of the Forest Show, they meet their match in the shape of a little sheep. It's not long before they are begging to be accepted again by the other animals. A brilliant follow-up to The Scallywags that shows, in the funniest possible way, that it doesn't pay to lose your temper. From the bestselling creator of the Hugless Douglas series, which has sold over 1.4 million copies in 26 languages. 'A

useful story to show children that it's no fun being at the receiving end of a bad temper.' - Junior 'Blown to Bits' is about how the digital explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives. It is well-documented that working hard isn't enough to keep your professional star rising: Self-promotion is recognized as one of the most important attributes for getting ahead. Khrushchev's 1959 trip across America was one of the strangest exercises in international diplomacy ever conducted - "a surreal extravaganza," as historian John Lewis Gaddis called it. Khrushchev told jokes, threw tantrums, sparked a riot in a San Francisco supermarket, wowed the coeds in a home economics class in Iowa, and ogled Shirley MacLaine as she filmed a dance scene in Can-Can. He befriended and offended a cast of characters including Nelson Rockefeller, Richard Nixon, Eleanor Roosevelt, Elizabeth Taylor, and Marilyn Monroe. Published for the fiftieth anniversary of the trip, K Blows Top is a work of history that reads like a Vonnegut novel. This cantankerous communist's road trip took place against the backdrop of the fifties in capitalist America, with the shadow of the hydrogen bomb hanging over his visit like the Sword of Damocles. As Khrushchev kept reminding people, he was a hot-tempered man who possessed the power to incinerate America. Junius Browne and Albert Richardson covered the Civil War for the New York Tribune until Confederates captured them as they tried to sneak past Vicksburg on a hay barge. Shuffled from one Rebel prison to another, they escaped and trekked across the snow-covered Appalachians with the help of slaves and pro-Union bushwhackers. Their amazing, long-forgotten odyssey is one of the great escape stories in American history, packed with drama, courage, horrors and heroics, plus moments of antic comedy. On their long, strange adventure, Junius and Albert encountered an astonishing variety of American characters -- Abraham Lincoln and Ulysses S. Grant, Rebel con men and Union spies, a Confederate pirate-turned-playwright, a sadistic hangman nicknamed "the Anti-Christ," a secret society called the Heroes of America, a Union guerrilla convinced that God protected him from Confederate bullets, and a mysterious teenage girl who rode to their rescue at just the right moment. Peter Carlson, author of the critically acclaimed K Blows Top, has, in Junius and Albert's Adventures in the Confederacy, written a gripping story about the lifesaving power of friendship and a surreal voyage through the bloody battlefields, dark prisons, and cold mountains of the Civil War. **THE TOP TEN SUNDAY TIMES BESTSELLER** 'Completely ingenious, entirely satisfying - a delight from start to finish' ALEX MICHAELIDES 'BY FAR Sophie Hannah's best one yet. Property will cost us the earth The science on climate change has been clear for a very long time now. Yet despite decades of appeals, mass street protests, petition campaigns, and peaceful demonstrations, we are still facing a booming fossil fuel industry, rising seas, rising emission levels, and a rising temperature. With the stakes so high, why haven't we moved beyond peaceful protest? In this lyrical manifesto, noted climate scholar (and saboteur of SUV tires and coal mines) Andreas Malm makes an impassioned call for the climate movement to escalate its tactics in the face of ecological collapse. We need, he argues, to force fossil fuel extraction to stop--with our actions, with our bodies, and by defusing and destroying its tools. We need, in short, to start blowing up some oil pipelines. Offering a counter-history of how mass popular change has occurred, from the democratic revolutions overthrowing dictators to the movement against apartheid and for women's suffrage, Malm argues that the strategic acceptance of property destruction and violence has been the only route for revolutionary change. In a braided narrative that moves from the forests of Germany and the streets of London to the deserts of Iraq, Malm offers us an incisive discussion of the politics and ethics of pacifism and violence, democracy and social change, strategy and tactics, and a movement
