MAKING AMERICA: A HISTORY OF THE UNITED STATES, BRIEF SIXTH EDITION, presents history as a dynamic process shaped by human expectations, difficult choices, and often the surprising consequences. With this focus on history as a process, MAKING AMERICA encourages readers to think historically and to develop into citizens who value the past. The clear chronology, straightforward narrative, and strong thematic structure emphasize communication over intimidation and appeal to readers of varied learning levels. The Brief Sixth Edition retains a hallmark feature of the MAKING AMERICA program: pedagogical tools that allow readers to master complex material and enable them to develop analytical skills. Every chapter has chapter outlines, chronologies, focus questions, and on-page glossaries (defining both key terms and general vocabulary) to provide guidance throughout the text; the open, inviting design allows readers to access and use pedagogy to improve learning. A wealth of images throughout provides a visual connection to the past, with captions that help readers analyze the subject of the painting, photograph, or artifact from an historical point of view. Investigating America gets to the heart of learning history: reading and analyzing primary sources. A new feature, In The Wider World introduces a global perspective for each chapter. In addition, a new map program provides clear, visually engaging maps with globe insets to put the map in a global context. Available in the following split options: MAKING AMERICA, Brief Sixth Edition Complete, Volume 1: To 1877, and Volume 2: Since 1865. Available with InfoTrac Student Collections <http://goengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Whether headed to the rugged backcountry, a day of scenic driving, or a summer vacation, the HIGHROAD GUIDES lead you to the best the mountains have to offer. Includes a minimum of 55 new maps, natural history information, and other general traveler's

information. Written by award-winning nature journalist Garvey Winegar and acclaimed outdoor writer/nature photographer Deane Dozier Winegar. **THE HOTLY ANTICIPATED NEW THRILLER FROM THE AUTHOR OF THE PICTURES – SHORTLISTED FOR THE CWA NEW BLOOD AWARD.** June 1947. Jonathan Craine has left his old life in Hollywood behind him. But when notorious gangster Bugsy Siegel is murdered, Craine is summoned back to Las Vegas to find his killer. All he has helping him is a lone crime reporter with her own agenda. He only has five days. Or there will be fatal consequences for Craine and his son. Updated to reflect questions found on the most recent ESL tests, this book presents 400 common phrasal verbs as they are used in everyday English. Phrasal verbs are verbs combined with prepositions or adverbs. Familiarity with phrasal verbs and understanding their use as nouns (breakup, showoff, etc.) or adjectives (spaced-out, broken-down, stressed-out, and many others) is essential to ESL students. Updated information includes: the most commonly used phrasal verbs; activities and examples that reflect our current technology and the world around us; an expanded introduction for the teacher with a thorough breakdown and explanation of phrasal verbs; and, a discussion of separable and inseparable phrasal verbs in Unit I, and more. This book's hundreds of examples in context and hundreds of exercises will be extremely useful to ESL students who are preparing for TOEFL or who simply wish to improve their English.

**Bizarre military history:** In 1979, a crack commando unit was established by the most gifted minds within the U.S. Army. Defying all known laws of physics and accepted military practice, they believed that a soldier could adopt the cloak of invisibility, pass cleanly through walls, and—perhaps most chillingly—kill goats just by staring at them. They were the First Earth Battalion, entrusted with defending America from all known adversaries. And they really weren't joking. What's more, they're back—and they're fighting the War on Terror. An uproarious exploration of American military paranoia: With investigations ranging from the mysterious "Goat Lab," to Uri Geller's covert psychic work with the CIA, to the increasingly bizarre role played by a

succession of U.S. presidents, this might just be the funniest, most unsettling book you will ever read—if only because it is all true and is still happening today. Argues that most words do not have multiple meanings and criticizes the assignment of additional meanings through overspecification Mick Herron, “the le Carré of the future” (BBC), expands his world of bad spies with an even shadier cast of characters: the politicians, lobbyists, and misinformation agents pulling the levers of government policy. “Confirms Mick Herron as the best spy novelist now working.”—NPR’s Fresh Air Now an Apple TV+ series starring Gary Oldman and Kristin Scott Thomas. In London’s MI5 headquarters a scandal is brewing that could disgrace the entire intelligence community. The Downing Street superforecaster—a specialist who advises the Prime Minister’s office on how policy is likely to be received by the electorate—has disappeared without a trace. Claude Whelan, who was once head of MI5, has been tasked with tracking her down. But the trail leads him straight back to Regent’s Park itself, with First Desk Diana Taverner as chief suspect. Has Taverner overplayed her hand at last? Meanwhile, her Russian counterpart, Moscow intelligence’s First Desk, has cheekily showed up in London and shaken off his escort. Are the two unfortunate events connected? Over at Slough House, where Jackson Lamb presides over some of MI5’s most embittered demoted agents, the slow horses are doing what they do best, and adding a little bit of chaos to an already unstable situation . . . There are bad actors everywhere, and they usually get their comeuppance before the credits roll. But politics is a dirty business, and in a world where lying, cheating and backstabbing are the norm, sometimes the good guys can find themselves outgunned. In the second part of John le Carré’s Karla Trilogy, the battle of wits between spymaster George Smiley and his Russian adversary takes on an even more dangerous dimension. George Smiley, now acting head of the Circus, must rebuild its shattered reputation after one of the biggest betrayals in its history. Using the talents of journalist and occasional spy Jerry Westerby, Smiley launches a risky operation uncovering a Russian money-laundering scheme in the Far East. His aim: revenge on Karla, head

of Moscow Centre and the architect of all his troubles. 'Energy, compassion, rich and overwhelming sweep of character and action' The Times 'A remarkable sequel ... the achievement is in the characters, major and minor ... all burned on the brain of the reader' The New York Times THE SIXTH GEORGE SMILEY NOVEL

In the last few decades, near-infrared (NIR) spectroscopy has distinguished itself as one of the most rapidly advancing spectroscopic techniques. Mainly known as an analytical tool useful for sample characterization and content quantification, NIR spectroscopy is essential in various other fields, e.g. NIR imaging techniques in biophotonics, medical applications or used for characterization of food products. Its contribution in basic science and physical chemistry should be noted as well, e.g. in exploration of the nature of molecular vibrations or intermolecular interactions. One of the current development trends involves the miniaturization and simplification of instrumentation, creating prospects for the spread of NIR spectrometers at a consumer level in the form of smartphone attachments—a breakthrough not yet accomplished by any other analytical technique. A growing diversity in the related methods and applications has led to a dispersion of these contributions among disparate scientific communities. The aim of this Special Issue was to bring together the communities that may perceive NIR spectroscopy from different perspectives. It resulted in 30 contributions presenting the latest advances in the methodologies essential in near-infrared spectroscopy in a variety of applications. Precision agriculture is a reality in agriculture and is playing a key role as the industry comes to terms with the environment, market forces, quality requirements, traceability, vehicle guidance and crop management. Research continues to be necessary, and needs to be reported and disseminated to a wide audience. These proceedings contain reviewed papers presented at the 12th European Conference on Precision Agriculture, held at Montpellier SupAgro, France. The papers reflect the wide range of disciplines that impinge on precision agriculture - technology, crop science, soil science, agronomy, information technology, decision support, remote sensing and others. The broad range of research topics reported will be

a valuable resource for researchers, advisors, teachers and professionals in agriculture long after the conference has finished. "The Legend of Polaris" recounts the remarkable saga of the company that invented the snowmobile. After becoming the number one manufacturer of snowmobiles, Polaris went on to create the first automatic transmission ATV; a line of stable, reliable personal water craft; a sport-boat line; and Victory, the company's celebrated motorcycles. Profiles of 750 major U.S. companies. Cowgirl Trail is part of a six-book series about four generations of the Morgan family living, fighting, and thriving amidst a turbulent Texas history spanning from 1845 to 1896. Although a series, each book can be read on its own. In 1884 Maggie Porter returns to the Rocking P Ranch. The sanatorium was not able to save her mother and now her father's health is failing. When the cowboys walk off the job leaving no one to drive the cattle to market, head ranch hand, Alex Bright, cannot convince the men to stay. How could Alex let this happen? Maggie is desperate to save the ranch and she turns to the town's women for help. The new cowgirls must herd, rope, and drive the cattle to market. With only two days left, outlaws charge the small band of cowgirls in an effort to start a stampede. The cattle begin to scatter. Will they lose everything? Where will their help come from? The Complete Book of Ford Mustang, 4th Edition details the development, technical specifications, and history of America's original pony car, now updated to cover cars through the 2021 model year. Digital agriculture is gaining traction among scientists implementing different new and emerging sensor technologies to monitor complex soil-plant-atmosphere interactions in an accurate, cost-effective and user-friendly manner. This book presents some of the latest advances in this emerging area of research. The diversity of applications in which digital agriculture can make an important difference in day-to-day farming decision making makes this discipline an important focus of research internationally. On The Frontier There Was One Rule: Learn To Kill, Or Prepare To Die. . . Christopher Guthrie was bred by money, educated by Harvard, saved from the Civil War by an oak desk in Washington D.C. Towering, fierce Wolf Riker was honed by a kind of suffering Guthrie could never imagine. Fate throws these two men together when a stagecoach from Baton Rouge is set upon by killers. The price for Guthrie's survival is joining Riker's trail drive to Kansas, a mad, brawling charge of longhorns and backstabbers. Guthrie is soon bound by Riker's rules, surrounded by his kill-crazy crew, surviving one danger after another and protecting a beautiful young woman as he goes. And it will be here, amidst floods and battles, cut off from his past and civilization, that Christopher Guthrie will emerge a

different man. . .for better or worse. As for Wolf Riker, he is running from demons from which only God Himself can save him. . . "Crackling with the fury of a desert storm." --True West on The Rebel: Johnny Yuma
