web linear algebra and its applications is a biweekly peer reviewed mathematics journal published by elsevier and covering matrix theory and finite dimensional linear algebra history edit the journal was established in january 1968 with a j hoffman a s householder a m ostrowski h schneider and o tausky todd as founding editors web step 2 convert the equation in the form of $y = mx + b$ this will give $y = x \cdot 2 + 1$ step 3 now we can replace the value of x for different numbers and get the resulting value of y to create the coordinates step 4 when we put $x = 0$ in the equation we get $y = 0 \cdot 2 + 1 = 1$ web linear algebra is a branch of mathematics that studies systems of linear equations and the properties of matrices the concepts of linear algebra are extremely useful in
