The Fish Rots from the Head Sep 26 2022 To the outsider, Brazil is a happy democracy rising on the world stage, future home to the Olympics and the World Cup of soccer. In truth, the world's tenth largest economy has only the 169th best distribution of income, giving it extremely high rates of poverty and violence for a rich country not at war. After 500 years without a true democracy, it resembles a feudal oligarchy. Based on interviews with Brazilians, *The Fish Rots from the Head* uses a non-academic style and an informal tone to report how government officials commit white-collar crime with impunity. Even confessed murderers won't go to jail if they have money for legal appeals. The citizens describe an essentially dishonest government built upon a Constitution which guarantees a "cleptocracy." They say their government cannot reform itself, not without the insistence of a popular movement. Unfortunately, the people, themselves, say they are incapable of action. *The Fish Rots from the Head* reports the written and spoken opinions of Brazilians and contains information which will be irritating to the rulers of Brazil. The government tolerates criticism from citizens, but it has a history of attempting to punish foreigners who make critical statements, even if they are only reporting what others have said. A. H. Understanding Corruption Jan 19 2022 This volume together with scholars specializing in different parts of the world to give us a comparative understanding of the persistence of corruption in some societies. The reader is privileged to learn from the many global variations that are skilfully presented for further analyses. Corruption is a salient feature of human condition in any organized society. Further, where risks are low and the returns high, corruption is almost inevitable. Apart from this, traditional public behaviour comes precariously close to what in the West might amount to corrupt practices. Bureaucratic corruption should be understood in the light of a clash of morality on the one hand and legality on the other. There is a contradiction between traditional values, which are held in respect and are a part of everyday life of a people, and norms of the larger society which stand out as compelling forces. The idea of the modern division between the public and private office is alien to a traditional culture and corruption finds space when this division is not strictly observed. Seven essays in this volume cover a range of countries which include India, South Africa, Nigeria, Zimbabwe, and Indonesia. As the essays unfold themselves, the problem of corruption takes on an added dimension, that of a legacy left behind by colonialism. Please note: This title is co-published with Social Science Press, New Delhi. Taylor & Francis does not sell or distribute the Hardback in India, Pakistan, Nepal, Bhutan, Bangladesh and Sri Lanka.

Modern Folk Devils Jun 11 2021 The devilish has long been integral to myths, legends, and folklore, firmly located in the relationships between good and evil, and selves and others. But how are ideas of evil constructed in current times and framed by contemporary social discourses? *Modern Folk Devils* builds on and works with Stanley Cohen's theory on folk devils and moral panics to discuss the constructions of evil. The authors present an array of case-studies that illustrate how the notion of folk devils nowadays comes into play and animates ideas of otherness and evil throughout the world. Examining current fears and perceived threats, this volume investigates and analyzes how and why these devils are constructed. The chapters discuss how the devilish may take on many different forms: sometimes they exist only as a potential threat, other times they are a single individual or phenomenon or a visible group, such as refugees, technocrats, Roma, hipsters, LGBT groups, and rightwing politicians. Folk devils themselves are also given a voice to offer an essential complementary perspective on how panics become exaggerated, facts distorted, and problems acutely angled. Bringing together researchers from anthropology, sociology, political studies, ethnology, and criminology, the contributions examine cases from across the world spanning from Europe to Asia and Oceania.

Do Fish Feel Pain? Nov 16 2021 While there has been increasing interest in recent years in the welfare of farm animals, fish are frequently thought to be different. In many people's perception, fish, with their lack of facial expressions or recognisable communication, are not seen to count when it comes to welfare. Angling is a major sport, and fishing a big industry. Millions of fish are caught on barbed hooks, or left to die by suffocation on the decks of fishing boats. Here, biologist Victoria Braithwaite explores the question of fish pain and fish suffering, explaining what we now understand about fish behaviour, and examining the related ethical questions about how we should treat these animals. She asks why the question of pain in fish has not been raised earlier, indicating our prejudices and assumptions; and argues that the latest and growing scientific evidence would suggest that we should widen to fish the protection currently given to birds and mammals.

The Business Case for Love Mar 21 2022 Love it? Hate it? Or, just don't care? How we feel about something dramatically affects how we interact with it. When we feel, we care. When we care, things happen. Companies that are thriving, not just surviving, are much more than a set of ruthlessly efficient and mechanistic processes – they are a social system operated by people for people. The quality of relationships, both inside and outside the organization is a far more important driver of sustainable success or failure than the quality of its control systems. The head is important, but it is the heart that matters most. If you want your customers to be brand ambassadors and your employees to brag about you to their friends, you need them to not just think you're great – you need them to feel you're great. You need them to love you – and for that, you need them to feel that you love them. For over a decade Marc Cox has been helping companies whose toxic cultures, miserable employees, and angry customers have all but destroyed them to rebuild their company spirit, discover the business case for love and build an organization that is wonderful to work for, brilliant to do business with and has the mindset of creating memorable employee and customer experiences. Underpinned by fresh insights and perspectives, robustly tested and refined by the real world experience of working with a wide range of companies and over 2,000 senior executives drawn from all parts of the world, and filled with fascinating and illustrative "love stories" the book will help you to make the business case for love. Kissing Fish Sep 14 2021 Christianity receives a lot of attention in the media, but the most frequently discussed version represents a type of Christianity that sometimes turns people away from the Church. *Kissing Fish* presents a postmodern systematic theology of progressive Christianity, a growing movement that reclaims the radical message of the Gospel. This informative, contemplative, and entertaining book will guide you through the beliefs that inspire us to love one another in the transformative way that Jesus proclaimed, including practices that will take your faith to a new level. *Kissing Fish* is a scholarly yet thoroughly accessible introduction to progressive Christianity. While the intended target audience for this work would seem to be those who have either left the Christian faith or never adopted it at all; the work is filled with pearls of wisdom for all of us, whether associated with Christianity or not. *Kissing Fish* is a truly remarkable work, serving both as a reminder of the beauty and grace that form the central tenets of the faith, while offering a graceful yet prophetic rebuttal to its more exclusionary tendencies. *Kissing Fish* is part theological text and part tell-all personal spiritual journey. Imagine a down-to-earth combination of the works of Marcus Borg, Anne Lamott, Jim Wallis, Rob Bell, Shane Claiborne, Diana Butler-Bass, Brian McLaren, Walter Wink, Wes Howard-Brook, and Donald Miller. A profound romp that informs and inspires.

Gould's Book of Fish Aug 14 2021 FROM THE WINNER OF THE MAN BOOKER PRIZE 2014 Once upon a time that was called 1828, before all fishes in the sea and all living things on the land were destroyed, there was a man named William Buelow Gould, a white convict who fell in love with a black woman and discovered too late that to love is not safe. Silly Billy Gould, invader of Australia, liar, murderer and forger, condemned to the most feared penal colony in the British Empire and there ordered to paint a book of fish.

The Fish Rots from the Head! Dec 30 2022 *The Fish Rots from the Head* takes the bull by the horns and addresses the challenges of poor customer service in Africa. The writer comes from Uganda but raises service challenges one sees everywhere on the African continent, often in establishments that lay claim to international accreditation. *The Fish Rots from the Head* is important because it attempts to approach the age-old challenge of customer relations management from an African point of view - specifically by illustrating that part of the problem is with cut and paste training programs as well as importing physical labor and standards that pay limited heed to the cultural mores of the natives. *The Fish Rots from the Head* is important because it acknowledges that by the time the customer encounters unsatisfactory service, the problem already lies elsewhere - with management. There is nothing new about this; what is new is admitting it in an African setting where it is always assumed that to invest money in setting up a business means that one is the owner of all wisdom. This book not only sheds light on the causes (often unseen) of poor customer service, but also best practice and practical solutions. All the case studies in the publication are from the writer's personal experience which gives the book the authority and authenticity of a native observer. This is a book intended for decision makers, managers, entrepreneurs, human resources practitioners, anyone studying administration and/or customer relationship management and those already struggling with how to improve seemingly intractable customer service standards in organizations that are already up and running.

The Fish that Ate the Whale May 11 2021 Whether you know him as El Amigo, the Banana Man, the Gringo, or simply Z - whether you even know him at all - Sam Zemurray lived one of the greatest untold American stories of the last hundred years. A tough, uneducated Russian Jew who found himself and his fortune in turn-of-the-century New Orleans, Zemurray built a fruit-selling empire hustling rotting fruit to market to eke out the slimmest profit, to eventually become a backchannel kingmaker and capitalist revolutionary. *The Fish That Ate the Whale* spans the transition from Old-World business to New-: from privateer adventurers seeking fortunes in remote frontiers, to buccaneers of high finance and wars fought with media, no-bid contracts, and necessary illusions. Part of what makes this book so remarkable - and its dubious hero so compelling - is the almost invisible ease with which Cohen's threads intertwine to create a larger pattern that seems so obvious once you step back to see it. Z's story spans the birth of modern foreign relations, the creation of the CIA, smuggling dispossessed Jews out of Europe, the invention of Israel, corporate espionage, the Bay of Pigs, political assassination, and the unspoken motives of the Cold War. It is a twentieth-century epic, and standing at its core is a man unlike any we've seen before or since, who, for good or ill, looked at what was, but saw only what was possible.

Eat Like a Fish Dec 06 2020 'I used to be a commercial fisherman, chasing your dinner on the high seas for a living, but now I farm twenty acres of saltwater, growing a mix of sea greens and shellfish.' In *Eat Like a Fish* Bren Smith - a former commercial fisherman turned restorative ocean farmer - shares a bold new vision for the future of food: seaweed. Part memoir, part manifesto, through tales that span from his childhood in Newfoundland to his years on the high seas aboard commercial fishing trawlers, from pioneering new forms of ocean farming to surfing the frontiers of the food movement, Smith introduces the world of sea-based agriculture and advocates getting ocean vegetables onto our plates. There are thousands of edible varieties in the sea! Here he shows how we can transform our food system while enjoying delicious, nutritious, locally grown produce, and how restorative ocean farming has the potential to create millions of new jobs and protect our planet in the face of climate change, rising populations, and finite food resources. Also included are recipes from acclaimed chefs Brooks Headley and David Santos. Written with the humour and swagger of a fisherman telling a late-night tale, this is a monumental work of deeply personal food policy that will profoundly change the way we think about what we eat.

Finding the Mother Tree Oct 04 2020 NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery “Finding the Mother Tree reminds us that the world is a web of stories, connecting us to one another. [The book] carries the stories of trees, fungi, soil and bears—and of a human being listening in on the conversation. The interplay of personal narrative, scientific insights and the amazing revelations about the life of the forest make a compelling story.”—Robin Wall Kimmerer, author of *Braiding Sweetgrass* Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; her TED talks have been viewed by more than 10 million people worldwide. In this, her first book, now available in paperback, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths—that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes—in inspiring, illuminating, and accessible ways—how trees, living side by side for hundreds of years, have evolved, how they learn and adapt their behaviors, recognize neighbors, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies—and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. And Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them. And as she writes of her scientific quest, she writes of her own journey, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world.

The Fish Rots From The Head Jan 31 2023 As a Chinese proverb says 'The fish rots from the head' and so it is with businesses and other organisations - the buck starts and stops in the boardroom. This third edition of Bob Garratt's bestselling book that highlights the importance of effective corporate governance has been extensively updated following the corporate scandals of the early 2000s - Enron, WorldCom, Tyco - and the abysmal boardroom standards that the recent credit crunch and ensuing global financial crisis brought to light. This new edition builds on the Learning Board model developed by the author and now widely used internationally by corporations and public sector organisations such as the NHS. The result is a thought-provoking and highly practical book that will be invaluable to all those with responsibility for corporate governance - and also those who subject them to scrutiny. What Sir Adrian Cadbury, whose committee's groundbreaking report on corporate governance was published nearly twenty years ago, said about the first edition remains as true today as ever: 'No director can afford to ignore this book'.

Small-scale Aquaponic Food Production Nov 24 2019 This technical paper begins by introducing the concept of aquaponics, including a brief history of its development and its place within the larger category of soil-less culture and modern agriculture. It discusses the main theoretical concepts of aquaponics, including the nitrogen cycle and the nitrification process, the role of bacteria, and the concept of balancing an aquaponic unit. It then moves on to cover important considerations of water quality parameters, water testing, and water sourcing for aquaponics, as well as methods and theories of unit design, including the three main methods of aquaponic systems: media beds, nutrient film technique, and deep water culture. The publication discusses in detail the three groups of living organisms (bacteria, plants and fish) that make up the aquaponic ecosystem. It also presents management strategies and troubleshooting practices, as well as related topics, specifically highlighting local and sustainable sources of aquaponic inputs. The publication also includes nine appendixes that present other key topics: ideal conditions for common plants grown in aquaponics; chemical and biological controls of common pests and diseases including a compatible planting guide; common fish diseases and related symptoms, causes and remedies; tools to calculate the ammonia produced and biofiltration media required for a certain fish stocking density and amount of fish feed added; production of homemade fish feed; guidelines and considerations for establishing aquaponic units; a cost-benefit analysis of a small-scale, media bed aquaponic unit; a comprehensive guide to building small-scale versions of each of the three aquaponic methods; and a brief summary of this publication designed as a supplemental handout for outreach, extension and education.

Stop the Rot May 23 2022 Following the international success of *The Fish Rots from the Head: Developing Effective Directors*, this sequel from Bob Garratt explains the public's distrust of the people who govern us - the directors, owners, regulators and politicians - and how this can be changed. Currently, Corporate Governance is too narrow and fragmented. The growing gap between the angry public and the urban elite, made manifest by Brexit and Trump, is due to a lack of appreciation by both parties of the roles and values of well-governed organisations in bonding a society at both national and international levels. This book pulls no punches and directly challenges directors and politicians to reframe their thinking about 'governance' to address the public's distrust of them. This is the ROT that needs to be STOPPED. This book is truly radical in going back to basics and then designing a new national action learning system between the four main players overseen by continuous public scrutiny. It is designed to counter the official reports of organisational failure that end too frequently with the weasel words 'but the main problem was a failure of corporate governance'. Currently this is code for 'so no-one can do much about it'. This book shows what can be done. The book explains how the disjointed responses to the angry public have resulted in a series of unhelpful regulations made worse by their thoughtless application. This reaction has reduced the chances of directors being able to deliver their main purpose - ensuring the future of their business by better understanding the complexities of their future financial, social and environmental policies and enabling improved creativity and thoughtful risk-taking. *Stop the Rot* sets governance in a much wider social context. The acceptance of global Human Values in all of our organizations, with their necessary ethics and behaviours, ensures the development of Inclusive Capitalism to the advantage of all.
