**Contemporary Issues in Sustainable Finance** Jun 23 2022 This book sheds light on current issues in sustainable finance through an in-depth analysis and discussion of relevant sustainable products and sustainable initiatives of several financial institutions. This edited collection critically presents and discusses several relevant theoretical issues, case studies of innovative financial products and sustainable institutions, as well as empirically investigates issues related to both financial and social performance. The book focuses on several innovative products across the sustainable finance ecosystem, including social impact bonds, crowdfunding and green bonds. Similarly, the book spotlights the sustainable investment strategies of institutions ranging from family foundations to asset managers.

**Credit Derivatives** Sep 02 2020 The Third Edition of Credit Derivatives is a complete reference work offering comprehensive information on credit derivative products, applications, pricing/valuation approaches, documentation issues and accounting/taxation aspects of such transactions. Previous editions have consisted of a number of chapters written by the author and a collection of papers from leading market practitioners. This edition departs from the previous format -- all chapters have been written by the author, Satyajit Das. Key areas of new and enhanced coverage include: Inclusion of latest developments in documentation (the 2003 Credit Derivative Definitions and market developments such as Master Confirmations). Description of developments in structured credit products, including portfolio products, up-front credit default swaps, quanto credit default swaps, credit swaptions, zero recovery credit default swaps, first-to-default swaps/ Nth ?to-default swaps, and many more. Increased coverage of credit linked notes including repackaging structures. Detailed discussion of the collateralized debt obligations (?CDO?) market, including CDO structures, pricing and valuation, rating methodology, CDO variations, single tranche CDOs, hedging of CDO tranches, behavior of CDO tranche (equity, mezzanine, senior and super senior) investments. Increased coverage of pricing of credit default swaps (including models and valuation approaches) and discussion of cash-synthetic basis and its causes and behavior. Coverage of E2C (equity to credit) hedging. Detailed examples of applications of credit derivatives by different market participants. Discussion of trading in credit derivatives including more complex trading strategies such as basis trading and capital structure arbitrage trades. Updated coverage of regulatory framework for credit derivatives. Updated discussion of market structures, developments and prospects. Order your copy of this comprehensive work today.

**Financial Future Insurance** Dec 06 2020 Do you have a financial future?Set and reach money goals.Set-up a tax-FREE investment account.Buy and hold 10 mutual funds all your life.The greatest impediment to financial freedom is debt. Most of us live paycheck to paycheck. Freedom from our chains of lifelong payments requires immediate action: cutting credit cards and amputation of some of our costly toys and habits. Going cold turkey is the only way to save our life in rehab. When we have financial freedom, we can buy new toys using the profits from our investments. Right now, you are making other people wealthy from your monthly payments. When you pay \$161 per month for 10+ years on your credit card balance of \$10,050, you will spend at least \$19,360. You pay almost double for that same \$10,050! I will show you how to be on the other side of the deal—collecting \$20,000 for your investment of \$10,000. Over time, you can be your own bank and own your toys WITHOUT making payments. Your investments can provide you with a home down payment or business start-up. You can be assured of a financial future. You could be a millionaire from \$9 a day. See page 39. Listen to how this parking lot attendant did it: <https://www.youtube.com/watch?v=qLUIOxQr3bo> Unfortunately our schools don't teach us how to avoid becoming debtors for the rest of our lives. They could teach us how to accumulate \$1 million by compounding \$9 a day. If we learned how to double our account early, we would save ourselves the grief of financial enslavement for the rest of our lives. We could learn the simple financial essentials—accumulate assets as soon as possible. We don't need complicated insurance, mutual funds, or financial products to have the good life. We can buy our freedom with only \$9 a day. We don't waste \$3,000 a year on high-cost financial products and taxes. We avoid the two KILLERS of wealth accumulation—taxes and fees.

**Fundamentals of Financial Instruments** Nov 28 2022 In the newly revised Second Edition of Fundamentals of Financial Instruments: An Introduction to Stocks, Bonds, Foreign Exchange, and Derivatives, renowned finance trainer Sunil Parameswaran delivers a comprehensive introduction to the full range of financial products commonly offered in the financial markets. Using clear, worked examples of everything from basic equity and debt securities to complex instruments—like derivatives and mortgage-backed securities – the author outlines the structure and dynamics of the free-market system and explores the environment in which financial instruments are traded. This one-of-a-kind book also includes: New discussions on interest rate derivatives, bonds with embedded options, mutual funds, ETFs, pension plans, financial macroeconomics, orders and exchanges, and Excel functions for finance Supplementary materials to enhance the reader's ability to apply the material contained within A foundational exploration of interest rates and the time value of money Fundamentals of Financial Instruments is the ideal resource for business school students at the undergraduate and graduate levels, as well as anyone studying financial management or the financial markets. It also belongs on the bookshelves of executive education students and finance professionals seeking a refresher on the fundamentals of their industry.

**Financial Products** Oct 16 2021 This is the 2006 loose leaf supplement to be filed into the three volume loose leaf book that is called Financial Products. Financial Products provides a road map to work one's way through the tax and regulatory maze for financial products. It details the policies, rules, and interpretations that govern the federal regulation and taxation of securities, derivatives, commodities, options, and hybrid products. It provides reliable answers to questions about financial markets and products and will help in planning transactions and in defending challenged tax positions. This 2006 Supplement serves as the annual update for the volumes. The three volume set itself is ISBN 0-7355-1145-4.

**Business Practices of FDIC-insured Institutions Selling Nondeposit Investment Products** Jan 25 2020

**Structured Finance and Collateralized Debt Obligations** Jun 11 2021 An up-to-date look at the exploding CDO and structured credit products market In this fully updated Second Edition, financial expert Janet Tavakoli provides readers with a comprehensive look at the CDO and structured credit products market amid recent developments. In addition to a detailed overview of the market, this book presents key issues in valuing structured financial products and important quality control issues. Tavakoli shares her experiences in this field, as she examines important securitization topics, including the huge increase in CDO arbitrage created by synthetics, the tranches most at risk from new technology, dumping securitizations on bank balance sheets, the abuse of offshore vehicles by companies, the role of hedge funds, critical issues with subprime, Alt-A, and prime mortgage securitizations, and securitizations made possible by new securitization techniques and the Euro. While providing an overview of the market and its dynamic growth, Tavakoli takes the time to explore the types of products now offered, new hedging techniques, and valuation and risk/return issues associated with investment in CDOs and synthetic CDOs.

**Environmental Finance** Jul 25 2022 An engaging and comprehensive look at the intersection of financial innovation and the environment This unique book provides readers with a comprehensive look at the new markets being created to help companies manage environmental risks, including weather derivatives, catastrophe bonds, and emission trading permits. Filled with real-world case studies and timely advice, Environmental Finance contains corporate strategies that financial service professionals as well as their clients must understand in order to proactively improve a company's environmental performance.

**The Routledge Companion to Financial Services Marketing** May 30 2020 Interest in Financial Services Marketing has grown hugely over the last few decades, particularly since the financial crisis, which scarred the industry and its relationship with customers. It reflects the importance of the financial services industry to the economies of every nation and the realisation that the consumption and marketing of financial services differs from that of tangible goods and indeed many other intangible services. This book is therefore a timely and much needed comprehensive compendium that reflects the development and maturation of the research domain, and pulls together, in a single volume, the current state of thinking and debate. The events associated with the financial crisis have highlighted that there is a need for banks and other financial institutions to understand how to rebuild trust and confidence, improve relationships and derive value from the marketing process. Edited by an international team of experts, this book will provide the latest thinking on how to manage such challenges and will be vital reading for students and lecturers in financial services marketing, policy makers and practitioners.

**An Introduction to Value-at-Risk** May 11 2021 The value-at-risk measurement methodology is a widely-used tool in financial market risk management. The fourth edition of Professor Moorad Choudhry's benchmark reference text An Introduction to Value-at-Risk offers an accessible and reader-friendly look at the concept of VaR and its different estimation methods, and is aimed specifically at newcomers to the market or those unfamiliar with modern risk management practices. The author capitalises on his experience in the financial markets to present this concise yet in-depth coverage of VaR, set in the context of risk management as a whole. Topics covered include: Defining value-at-risk Variance-covariance methodology Monte Carlo simulation Portfolio VaR Credit risk and credit VaR Topics are illustrated with Bloomberg screens, worked examples, exercises and case studies. Related issues such as statistics, volatility and correlation are also introduced as necessary background for students and practitioners. This is essential reading for all those who require an introduction to financial market risk management and value-at-risk.

**New Financial Instruments and Institutions** Aug 14 2021 New financial instruments—such as structured financial products and exchange-traded funds—and new financial institutions—including hedge funds and private-equity funds—present opportunities as well as policy and regulatory challenges in U.S. and Japanese financial markets. This book presents cutting-edge research from experts in academia and the financial industry on new instruments and new institutions while contrasting their developments in the different countries. The contributors highlight the innovative way in which Japanese financiers and government officials have learned from the U.S. regarding the introduction of new instruments into their market. New Financial Instruments and Institutions continues the productive collaboration between the Brookings Institution and the Nomura Institute of Capital Markets Research in examining current issues in capital and financial markets. Contributors include Jennifer Bethel (Babson College), Todd Broms (Managed ETFs, LLC), Frank Edwards (Columbia Business School), Allen Ferrell (Harvard Law School), Yasuyuki Fuchita (Nomura Institute of Capital Markets Research), Gary Gastineau (Managed ETFs, LLC), Ken Lehn (University of Pittsburgh), Josh Lerner (Harvard Business School), Frank Partnoy (University of San Diego Law School), Adam Posen (Institute for International Economics), Ken Scott (Stanford Law School), Steve G. Segal (Boston University, J.W. Childs Associates), Yuta Seki (Nomura Institute of Capital Markets Research, New York), Erik Sirri (Babson College), and Randall Thomas (Vanderbilt Law School).

**Governance Risk Management and Financial Product Development in Islamic Financial Institutions** Aug 26 2022 Master's Thesis from the year 2010 in the subject Business economics - Investment and Finance, grade: 1,7, Maastricht University (School of Business and Economics), course: -, language: English, abstract: 1.1 General Introduction to the Topic Islamic finance is on the march. The underlying logic is simple: All investments and services are consistent with the principles of Islamic law, called Shari'ah, which literally means 'a clear path to be followed and observed' (Hourani, 2004a). This clear path is followed only if profit does not stem from interest (riba), speculation (gharrar) or sectors that are considered sinful according to the Qur'an (haraam), namely everything that involves alcohol, tobacco, entertainment, gambling or pork, just to name a few. The high potential of Islamic finance is clear for three reasons. The first reason relates to the emergence of a new consumer type, as there is increased demand for a Shari'ah-compliant way of investing that stems from increased globalization. The middle class from emerging markets rose from one third to 56 percent between the 1990s and 2006 (The Economist, 2009). Many Muslim countries can be found in the list of emerging markets, such as Egypt, Pakistan and Indonesia. With the Muslim population of the world exceeding 1.5 billion people (about 21 percent of the world population) and due to the fact that it is the fastest growing religion, it becomes clear why the general conditions for Islamic finance are so favourable (Central Intelligence Agency, 2009). The second reason relates to the global trend for sustainable investment; the fact that Islamic finance is an ethical way of investing which does not invest in harmful businesses and instead donates purified gains to charity is becoming more and more attractive among non-Muslim investors as well (Global Finance, 2007). The Shari'ah aspect makes Islamic financial products an alternative to socially responsible investments (Khan, 2009). The last reason is a matter of trust; in the face of the financial crisis that began shattering the world in 2007, many investors lost confidence in the traditional banks and their practices (Reuters, 2008; CNN, 2009). Today even the Holy See states that 'the ethic principles on which Islamic finance is based may bring banks closer to their clients and to the spirit which should mark every financial service' (Bloomberg, 2009). According to recent estimates, IFIs could increase their assets under management from roundabout \$700 billion to over \$1.6 trillion in 2012 (Reuters, 2009). WICHTIG: Sämtliche Recherchetätigkeiten wurden bei in den Vereinigten Arabischen Emiraten ansässigen islamischen Banken vor Ort durchgeführt.

**Sustainable Finance and Banking** Sep 14 2021 Banking and finance play a fundamental role in public policy and economic performance as well as in all forms of commerce and industry. They are crucial in determining whether society - from governments to individual consumers - succeeds in following an environmentally sustainable path. However, those working in the financial sector are largely unaware of the rationale and pressures for sustainable development and its bearing on their work, while those in the relevant research and policy areas commonly overlook how vital the financial sector is for progress. Marcel Jeucken sets out to rectify this state of affairs, in a style which is accessible to those with no experience of environmental finance issues. He provides a comprehensive account of their interdependence: why the financial sector is crucial to achieving sustainability and why the triple bottom line of commercial, environmental and social success points the way forward for banking. From a systematic assessment of major banks around the world, he presents a comprehensive account of current best practice, an analysis of the differences in approach and performance, and recommendations of actions and policies for improved performance that will contribute to sustainable development.

**The Handbook of Financial Instruments** Mar 01 2023 An investor's guide to understanding and using financial instruments The Handbook of Financial Instruments provides comprehensive coverage of a broad range of financial instruments, including equities, bonds (asset-backed and mortgage-backed securities), derivatives (equity and fixed income), insurance investment products, mutual funds, alternative investments (hedge funds and private equity), and exchange traded funds. The Handbook of Financial Instruments explores the basic features of each instrument introduced, explains their risk characteristics, and examines the markets in which they trade. Written by experts in their respective fields, this book arms individual investors and institutional investors alike with the knowledge to choose and effectively use any financial instrument available in the market today. John Wiley & Sons, Inc. is proud to be the publisher of the esteemed Frank J. Fabozzi Series. Comprising nearly 100 titles—which include numerous bestsellers—The Frank J. Fabozzi Series is a key resource for finance professionals and academics, strategists and students, and investors. The series is overseen by its eponymous editor, whose expert instruction and presentation of new ideas have been at the forefront of financial publishing for over twenty years. His successful career has provided him with the knowledge, insight, and advice that has led to this comprehensive series. Frank J. Fabozzi, PhD, CFA, CPA, is Editor of the Journal of Portfolio Management, which is read by thousands of institutional investors, as well as editor or author of over 100 books on finance for the professional and academic markets. Currently, Dr. Fabozzi is an adjunct Professor of Finance at Yale University's School of Management and on the board of directors of the Guardian Life family of funds and the Black Rock complex of funds.

**Corporate Bonds and Structured Financial Products** Mar 21 2022 This book is a detailed account of the instruments that are used in the corporate bond markets, from conventional "plain vanilla" bonds to hybrid instruments and structured products. There is background information on bond pricing and yield, as well as a detailed look at the yield curve. The book covers the full set of instruments used by companies to raise finance, and which are aimed at a wide range of investors. It also discusses the analysis of these instruments. Topics covered include: \*Bond basics \*The yield curve \*Callable bonds \*Convertible bonds \*Eurobonds \*Warrants \*Commercial paper \*Corporate bonds credit analysis \*Securitisation \*Asset-backed securities \*Mortgage-backed securities \*Collateralised Debt Obligations \*Synthetic CDOs Written by one of the leading names in the fixed income markets today, this book should prove to be an invaluable reference guide for all those with an interest in corporate bond markets, whether as practitioners, consultants or researchers. \* Covers every major aspect of corporate credit markets \* Features bond instruments as well as aspects of bond analysis \* Covers conventional bonds as well as securitisation and structured financial products

**Finance** Dec 26 2019 This text brings together some of the research by leading exponents of the characteristics model and its application to finance. It examines: the characteristics model of portfolio behaviour and asset pricing, and the characteristics model as a unifying framework for analyzing financial markets.

**Accounting for Investments, Fixed Income Securities and Interest Rate Derivatives** Oct 04 2020 The financial crisis that started in mid-2007 resulted in the accounting standard setters and market regulators across the globe to come up with several proposals to modify the accounting standards. This book covers the revised standards that are already pronounced and covers the proposals that are currently being reviewed.

**Nuts and Bolts of Financial Products** Jan 07 2021

**Fundamentals of Financial Instruments** Jan 31 2023 The essential guide to financial instruments, logically presented Fundamentals of Financial Instruments deals with the global financial markets and the instruments in which they trade. While most books on finance tend to be heavily mathematical, this book emphasizes the concepts in a logical, sequential fashion, introducing mathematical concepts only at the relevant times. As a result, the reader gains conceptual clarity reinforced by just the right level of technical detail to ensure a comprehensive exposure to the skills needed in the financial world. Establishes a strong foundation for understanding global markets Acts as an invaluable resource for those considering a career in the financial markets Offers an accessible yet in-depth treatise on modern financial instruments Presents a logical navigational path for a typical student of finance who is attempting to come to terms with the intricacies of the subject Covering the fundamentals of various types of assets in a single volume, Fundamentals of Financial Instruments is a compact yet comprehensive one-stop reference for students and professionals in finance and economics.

**The Routledge Companion to Banking Regulation and Reform** Aug 02 2020 The Routledge Companion to Banking Regulation and Reform provides a prestigious cutting edge international reference work offering students, researchers and policy makers a comprehensive guide to the paradigm shift in banking studies since the historic financial crisis in 2007. The transformation in banking over the last two decades has not been authoritatively and critically analysed by the mainstream academic literature. This unique collection brings together a multi-disciplinary group of leading authorities in the field to analyse and investigate post-crisis regulation and reform. Representing the wide spectrum of non-mainstream economics and finance, topics range widely from financial innovation to misconduct in banking, varieties of Eurozone banking to reforming dysfunctional global banking as well as topical issues such as off-shore financial centres, Libor fixing, corporate governance and the Dodd-Frank Act. Bringing together an authoritative range of international experts and perspectives, this invaluable body of heterodox research work provides a comprehensive compendium for researchers and academics of banking and finance as well as regulators and policy makers concerned with the global impact of financial institutions.

**Wealth Management** Oct 28 2022 Typically, these are securities that provide them with a redemption amount, with may be either with full or partial capital protection, and some type of return. The book examines structured financial products, their polyvalent nature, and the results which could be expected from them. Return on structural instruments, which are essentially derivatives, is paid in function of a specific investment strategy on selected underlying asset(s). This essentially means on the performance of the underlyings, obtained by asset managers, which may be banks or hedge funds, through purchase or sale of embedded options. But there are risks. Both risk and return from structured products are related to three main issues: the volatility of future value of an underlying, the uncertainty of future events, and the exposure of the product. Every type of investment is subject to market forces, and the more leveraged a portfolio is, the greater will probably be both the assumed risk and the expected reward.-

**Green Finance and Investment Accessing and Using Green Finance in the Kyrgyz Republic Evidence from a Household Survey** Nov 16 2021 This report presents findings from a survey on green finance conducted among 1 000 households in the Kyrgyz Republic (Kyrgyzstan) in 2019. Although green finance is an emerging trend, knowledge about the appetite for green financial products and services in Kyrgyzstan is almost inexistent.

**Accounting for Financial Instruments** Nov 24 2019 Accounting for Financial Instruments is about the accounting and regulatory framework associated with the acquisition and disposal of financial instruments; how to determine their value; how to manage the risk connected with them; and ultimately compile a business valuation report. Specifically, the book covers the following topics, among others: Accounting for investments; Bills of Exchange; Management of Financial Risks; Financial Analysis (including the Financial Analysis Report); Valuation of a business (including the Business Valuation Report) and Money laundering. Accounting for Financial Instruments fills a gap in the current literature for a comprehensive text that brings together relevant accounting concepts and valid regulatory frameworks, and related procedures regarding the management of financial instruments (investments), which are applicable in the modern business world. The objective of the book is to provide a fundamental knowledge base for those who are interested in managing financial instruments (investments) or studying banking and finance or those who wish to make financial services, particularly banking and finance, their chosen career. Accounting for Financial Instruments is highly applicable to both professional accountants and auditors and students alike. Book jacket.

**Investing without Wall Street** Jul 01 2020 Praise for Sheldon Jacobs "Sheldon Jacobs is a level-headed gentleman who is a cross between Albert Einstein, the Dalai Lama, and Vanguard founder Jack Bogle and who had a solid record editing and publishing The No-Load Fund Investor financial newsletter for over a quarter-century." —MarketWatch "King of no-loads." —Investor's Business Daily "Dean of the no-load fund watchers." —USA Today "Among financial experts who are able to think with a small investor's perspective, no one is more level-headed than Sheldon Jacobs." —Bottom Line/Personal In July of 1993, Sheldon Jacobs was one of five nationally recognized mutual fund advisors chosen by The New York Times for a mutual fund portfolio competition. The portfolio that he selected produced the highest return of all contestants for almost seven years, and the Times quarterly publication of this contest helped him become one of the best-known mutual fund advisors in America. Investing without Wall Street shows investors how to achieve the greatest wealth with the least effort. It details the five essentials that even a kid could master and shows that they are all you need to be a successful investor. With this knowledge, the average investor can invest on his or her own and make \$252,000 more than a person investing the same way who shares his or her profits with professionals. This book will teach you how.

**Modern Islamic Banking** Dec 30 2022 A complete, detailed guide to modern Islamic banking fundamentals Modern Islamic Banking provides a comprehensive, up-to-the-minute guide to the products, processes and legal doctrines underlying Islamic banking. Written by a pioneering practitioner in the field, this book provides thorough guidance and expert-level perspective on the principles and applications of this alternative-banking model. You'll begin by learning the fundamentals, vocabulary and key concepts of Islamic banking, then explore key products including *istisna'a*, *murabaha*, *musharaka*, *ijara*, *sukuk*, and *salam*. Coverage then moves into practical applications of Islamic products to a variety of contexts including asset management, treasury, risk management, venture capital, SME finance, micro-finance and taxation. Regulatory frameworks are discussed in detail, including extensive coverage of post-financial crisis Islamic bank valuation. Islamic banking has experienced rapid growth over the past decade, a trend that is set to continue given the sector's successful weathering of the financial crisis. This book brings you up to speed on this alternative way of banking, and shows you how it applies within your own current practices. Understand the principles of Islamic banking and finance Learn the products, vocabulary and key concepts of the field Consider the applications in a variety of financial contexts Explore the regulatory frameworks and valuation of Islamic banks Islamic banking practices differ from Western banking in fundamental ways — it's these differences that shielded the sector during the global crisis, but they also require practitioners to understand a whole new set of rules, products and practices. Modern Islamic Banking gives you a solid understanding of the fundamentals and expert insight into modern practical applications.

**Trade Agreements and Financial Services** Feb 05 2021 Trade Agreements and Financial Services examines the cross-border agreements that have historically been focused on the trade of merchandise goods. Increasingly, emphasis is being placed on the provision of cross-border services. Notable among these are financial services. There is a clear link between economic development and the availability of financial products. Moreover, the financial services sector is, itself, a major industry that is fueling growth. The conditions under which financial services are offered in an international context are the subject of debate in the Western Hemisphere, Europe, Asia, and Latin America. Contents: Trade Agreements and Their Critical Elements Financial Transactions Without Borders General Agreement on Trade in Services: Agreement on Financial Services Asian Pacific Economic Cooperation Free Trade Area of the Americas Beyond Trade Agreements: European Monetary Union Readership: Undergraduates and professionals in finance. Keywords:

**Consumer Protection and Financial Literacy** Apr 09 2021

**Taxation of Financial Products, 2e** Feb 26 2020 "Taxation of Financial Products is designed for all financial services professionals. It explains the basics of selected financial products and their income tax treatment. Chapters focus on federal income tax basics, mutual funds, annuities, stocks, bonds, life insurance and qualified plans. The information provided is comprehensive and up to date with current tax laws and figures, as well as planning strategies." Taxation of Financial Products is written in plain English, and provides the financial services professional with the proper information needed to help meet clients' financial objectives. Material has been updated to reflect the changes made by the new distribution rules and the Tax Act of 2001, including updates to rules governing qualified plans, catch up contributions and simplification of required minimum distribution rules, and facts, figures, illustrations and examples have been updated. If you are taking this course for CE, the CE exam will automatically be added to your basket when selecting CE credit. Certain states require that a proctor/monitor supervise the exam taking process.

**Islamic Financial Products and Services Patronizing Behavior in Tatarstan** Oct 23 2019 Despite the tremendous growth shown by global Islamic financial services industry, there are Muslim minority countries that have not embraced Islamic finance yet and the Russian Federation is one of them. This research is conducted in the Republic of Tatarstan, a federal subject (part) of the Russian Federation, which has huge potential and promising future for the development of Islamic finance. The current study examines the role of perceived values and awareness among people of Tatarstan in patronizing Islamic financial products and services. The study has adopted the Theory of Reasoned Action (TRA) to examine the factors affecting Tatarstan citizens' behavioral intention to patronize Islamic financial products and services. The sample of 517 questionnaires was available for analysis. The data was analyzed using 'IBM SPSS Statistics' and 'IBM SPSS AMOS' computer software. 'IBM SPSS Statistics' was used at the initial stage to perform descriptive analysis. 'IBM SPSS AMOS' was employed to run Confirmatory Factor Analysis (CFA) and Structural Equation Modeling (SEM). The findings of the research show that awareness has a positive effect on attitude, and subjective norms have positive effect on intention to patronize Islamic financial products and services in Tatarstan.

**State and Local Financial Instruments** Mar 28 2020 The ability of a nation to finance its basic infrastructure is essential to its economic well-being in the 21st century. This second edition of State and Local Financial Instruments covers the municipal securities market in the United States from the perspective of its primary capital financing role in a fiscal federalist system, where subnational governments are responsible for financing the nation's essential physical infrastructure.

**Principles of Banking Regulation** Mar 09 2021 An accessible, comprehensive analysis of the main principles and rules of banking regulation in the post-crisis regulatory reform era, this textbook looks at banking regulation from an inter-disciplinary perspective across law, economics, finance, management and policy studies. It provides detailed coverage of the most recent international, European and UK bank regulatory and policy developments, including Basel IV, structural regulation, bank resolution and Brexit, and considers the impact on bank governance, compliance, risk management and strategy.

**Islamic Financial Products** Apr 21 2022 Islamic finance has grown exponentially since 1963 and has reached more than 70 countries around the world with the asset size of about \$2.5 trillion. The Islamic financial system today comprises a sizable asset base and there is evidence of sustained demand for Islamic financial products and services in the global market, with demand outstripping supply. This book provides a new source of understanding of the Islamic financial products in view of facilitating academia, industrialists, professionals, product designers, students and policymakers globally. There is a mass of literature on Islamic finance available to the market, but very little research is found in the form of book exclusively on Islamic financial products and their structures. Thus, this book is a timely contribution to the global market with Islamic financial product solutions.

**Financial Innovation: Theories, Models and Regulation** Feb 17 2022 Financial innovation is a regular feature of the global financial system. Financial innovation results in greater economic efficiency over time. In the process of creating a new financial product, besides basic theory of financial management, a financial engineer needs to acquire knowledge of optimization and financial modeling techniques. Modern financial innovation is underpinned by a rich literature including the seminal studies by Leovich (1985), Smith, Smithson, and Wilford (1990), Verghese (1990), Merton (1992), Levine (1997), John D Finnerty (2002), Tufano (2003) and Draghi (2008), among many others. This book corresponds to the need to provide an integrated study on financial innovation and the economic regulatory mechanism. A key part of financial innovation covered in the book is the process of creating innovative financial securities and derivative pricing that offers new pay-offs to investors. The book also covers a selection of empirical studies corroborating financial innovation theories. It also exposes myths surrounding performance evaluation models. This book is presented in six chapters. The first chapter outlines important considerations on the application of financial innovation theories. The second chapter presents the theories that underpin financial innovation practice. The third chapter focuses on use of technology for financial modeling. The fourth chapter identifies the relationship between financial innovation and the wider economic system. The fifth chapter discusses the place of financial innovation in the global financial system. The sixth and final chapter presents a comparative analysis of India and the United States.

**Just Financial Markets?** Sep 26 2022 Well-functioning financial markets are crucial for the economic well-being and the justice of contemporary societies. The Great Financial Crisis has shown that a perspective that naively trusts in the self-regulating powers of free markets cannot capture what is at stake in understanding and regulating financial markets. The damage done by the Great Financial Crisis, including its distributive consequences, raises serious questions about the justice of financial markets as we know them. This volume brings together leading scholars from political theory, law, and economics in order to explore the relation between justice and financial markets. Broadening the perspective from a purely economic one to a liberal egalitarian one, the volume explores foundational normative questions about how to conceptualize justice in relation to financial markets, the biases in the legal frameworks of financial markets that produce unjust outcomes, and perspectives of justice on specific institutions and practices in contemporary financial markets. Written in a clear and accessible language, the volume presents analyses of how financial markets (should) function and how the Great Financial Crisis came about, proposals for how the structures of financial markets could be reformed, and analysis of why reform is not happening at the speed that would be desirable from a perspective of justice.

**Dalhuisen on Transnational Comparative, Commercial, Financial and Trade Law Volume 3** Nov 04 2020 "This is the seventh edition of the leading work on transnational and comparative commercial, financial, and trade law, covering a wide range of complex topics in the modern law of international commerce and finance. As a guide for students and practitioners it has proven to be unrivalled. The work is divided into three volumes, each of which can be used independently or as part of the complete work. Volume 1, in the first chapter, covers the roots and foundations of private law; the different origins, structure, and orientation of civil and common law; the forces behind the emergence of a new transnational commercial and financial legal order, its meaning, concepts, and operation; the theoretical basis of the transnationalisation of the law in the professional sphere in that order; its methodology and the autonomous sources of the new law merchant or modern *lex mercatoria*, its international finance-driven impulses, and its relationship to domestic and transnational public policy and public order requirements. The second chapter covers the transnationalisation of dispute resolution in that order, especially international arbitration, and contains a critical analysis of the main challenges to its success, continuing credibility, and effectiveness. All three volumes may be purchased separately or as part of a single set."--

**Islamic finance** Jul 13 2021 Islamic finance is the only example of a financial system directly based on the ethical precepts of a major religion, providing not only investment guidelines but also a set of unique investment and financing products." Islamic finance is based on Shari'a, the Islamic law that provides guidelines for multiple aspects of Muslim life, including religion, politics, economics, banking, business and aspects of the legal system. What Shari'ah compliant financing (SCF) seeks to do is to shape financial practices and accompanying legal instruments that conform to Islamic law. Major financial principles of Shari'ah include a ban on interest, a ban on uncertainty, adherence to risk-sharing and profit-sharing, promotion of ethical investments that enhance society and do not violate practices banned in the Qur'an and tangible asset-backing. This Book tries to note the main Principal of Islamic finance. In addition to discuss the Improvement can be made in several areas to promote and enhance the providing Islamic financial services.

**Social Stock Exchanges** Jan 19 2022 This book examines funding platforms for impact investing known as social stock exchanges (SSE) and ways to approach impact investing at regulated traditional exchanges. The book analyses the antecedents and prerequisites for the successful implementation of SSEs. It presents the creation of SSEs as a necessary step towards a more democratic and popular impact investing market, and a way to align the asset search process for investors with capital access for entrepreneurs. It also analyses the installation of impact investing at traditional stock exchanges drawing from Green Bonds and Social Bonds. The book showcases successful financial structuring, integrating impact into existing financial products. It discusses standalone impact solutions, the status quo of impact investing, social entrepreneurship and the pros and cons of platforms versus the use of traditional stock exchanges for impact investing. It highlights aspects of adjusted portfolio and product structuring, innovation in the context of listing criteria and makes proposals for impact stock listings at platforms and traditional stock exchanges.

**Trust, Power and Public Relations in Financial Markets** May 23 2022 The public relations profession positions itself as expert in building trust throughout global markets, particularly after crisis strikes. Successive crises have tainted financial markets in recent years. Calls to restore trust in finance have been particularly pressing, given trust's crucial role as lubricant in global financial engines. Nonetheless, years after the global financial crisis, trust in financial markets remains both tenuous and controversial. This book explores PR in financial markets, posing a fundamental question about PR professionals as would-be 'trust strategists'. If PR promotes its expertise in building and restoring trust, how can it ignore its potential role in losing trust in the first place? Drawing on examples from state finance, international lending agencies, trade bodies, financial institutions and consumer groups in mature and emerging financial centres, this book explores the wide-ranging role of PR in financial markets, including: State finance and debt capital markets Investor relations, M&A and IPOs Corporate communications for financial institutions Product promotion and consumer finance Financial trade associations and lobbying Consumerism and financial activism. Far reaching and challenging, this innovative book will be essential reading for researchers, advanced students and professionals in PR, communication and finance.

**Structured Finance** Apr 29 2020 Comprehensive coverage of all major structured finance transactions Structured Finance is a comprehensive introduction to non-recourse financing techniques and asset-based lending. It provides a detailed overview of leveraged buyouts, project finance, asset finance and securitisation. Through thirteen case studies and more than 500 examples of companies, the book offers an in-depth analysis of the topic. It also provides a historical perspective of these structures, revealing how and why they were initially created. Instruments within each type of transaction are examined in detail, including Credit Default Swaps and Credit Linked Notes. A presentation of the Basel Accords offers the necessary background to understand the regulatory context in which these financings operate. With this book, readers will be able to: Delve into the main structured finance techniques to understand their components, mechanisms and how they compare Understand how structured finance came to be, and why it continues to be successful in the modern markets Learn the characteristics of financial instruments found in various structured transactions Explore the global context of structured finance, including the regulatory framework under which it operates Structured Finance provides foundational knowledge and global perspective to facilitate a comprehensive understanding of this critical aspect of modern finance. It is a must-read for undergraduate and MBA students and finance professionals alike.

**Financial Behavior** Dec 18 2021 Financial Behavior: Players, Services, Products, and Markets provides a synthesis of the theoretical and empirical literature on the financial behavior of major stakeholders, financial services, investment products, and financial markets.
