Football Dynamo Nov 28 2022 In 1991, the collapse of the USSR seemed to signal the death of the Russian football industry, as the money, the players and the fans left. But now the oligarchs who profited from the post-Soviet turmoil are supporting the nation's football clubs and their dreams of glory, resulting in unprecedented success. Along this journey into the heart of Russian football, Marc Bennetts meets the managers, oligarchs, players, pundits and fans that define the Russian Premier league, now the fastest-growing and most intriguing football league in the world. From Andrei Arshavin and the national team's adventures at Euro 2008 to the symbolism of a club from war-torn Chechnya lifting the Russian FA Cup, Football Dynamo uncovers shocking revelations about corruption, hooliganism and racism, but also the true beauty of the game and the country.

Digital Performance Nov 16 2021 The historical roots, key practitioners, and artistic, theoretical, and technological trends in the incorporation of new media into the performing arts. The past decade has seen an extraordinarily intense period of experimentation with

computer technology within the performing arts. Digital media has been increasingly incorporated into live theater and dance, and new forms of interactive performance have emerged in participatory installations, on CD-ROM, and on the Web. In *Digital Performance*, Steve Dixon traces the evolution of these practices, presents detailed accounts of key practitioners and performances, and analyzes the theoretical, artistic, and technological contexts of this form of new media art. Dixon finds precursors to today's digital performances in past forms of theatrical technology that range from the *deus ex machina* of classical Greek drama to Wagner's *Gesamtkunstwerk* (concept of the total artwork), and draws parallels between contemporary work and the theories and practices of Constructivism, Dada, Surrealism, Expressionism, Futurism, and multimedia pioneers of the twentieth century. For a theoretical perspective on digital performance, Dixon draws on the work of Philip Auslander, Walter Benjamin, Roland Barthes, Jean Baudrillard, and others. To document and analyze contemporary digital performance practice, Dixon considers changes in the representation of the body,

space, and time. He considers virtual bodies, avatars, and digital doubles, as well as performances by artists including Stelarc, Robert Lepage, Merce Cunningham, Laurie Anderson, Blast Theory, and Eduardo Kac. He investigates new media's novel approaches to creating theatrical spectacle, including virtual reality and robot performance work, telematic performances in which remote locations are linked in real time, Webcams, and online drama communities, and considers the "extratemporal" illusion created by some technological theater works. Finally, he defines categories of interactivity, from navigational to participatory and collaborative. Dixon challenges dominant theoretical approaches to digital performance—including what he calls postmodernism's denial of the new—and offers a series of boldly original arguments in their place.

The Century of Space Science Jan 31 2023 One of the most attractive features of the young discipline of Space Science is that many of the original pioneers and key players involved are still available to describe their field. Hence, at this point in history we are in a unique position to gain first-hand insight into the field and its development. To this end, *The Century of Space*

Science, a scholarly, authoritative, reference book presents a chapter-by-chapter retrospective of space science as studied in the 20th century. The level is academic and focuses on key discoveries, how these were arrived at, their scientific consequences and how these discoveries advanced the thoughts of the key players involved. With over 90 world-class contributors, such as James Van Allen, Cornelis de Jager, Eugene Parker, Reimar Lüst, and Ernst Stuhlinger, and with a Foreword by Lodewijk Woltjer (past ESO Director General), this book will be immensely useful to readers in the fields of space science, astronomy, and the history of science. Both academic institutions and researchers will find that this major reference work makes an invaluable addition to their collection.

An Analytical Guide to Television's One Step Beyond, 1959-1961 May 23 2022 Alcoa Presents: One Step Beyond made its television debut in 1959, nine months before Rod Serling's classic *The Twilight Zone*, and paved the way for a generation of television programs devoted to paranormal topics such as the occult, ESP, and ghost stories. *One Step Beyond* was also where some of Hollywood's most famous leading men, including Warren Beatty, William Shatner, and Charles

Bronson, got their starts in television. This complete reference work to the 96 half-hour episodes that ran for three seasons on ABC also offers a detailed history, extensive commentary and summaries of the critical reception of *One Step Beyond* as well as coverage of the sequel series produced in 1978 entitled *The Next Step Beyond*. Complete credits for both series are provided.

New Scientist Sep 26 2022 *Man of Ruin* Mar 01 2023 PEE OF DESTRUCTION! IT BURNS THROUGH EVERYTHING IT TOUCHES! JUST LIKE THE ACID-FOR-BLOOD IN THE ALIEN MOVIES (SORT OF)! Yes, you read that correctly. That is the premise of this book. Indeed it is the premise of a series of three books known collectively as the *Junk Food Dynamo Trilogy*, of which this is the first exciting instalment. So it's all about a guy called Dave. He's having a pretty Goddamn bloody awful day, as you might imagine. For one thing, he can't urinate anywhere without causing

massive destructive. And for another... well, wasn't the first thing enough? Give the guy a break! He's not got a whole lot of options really. It's a case of problems, rather than options. How to cope? Where to wee? Why in the hell is this happening to me? Then there's the police to consider. If you want to find out more, read the damn book! It's aimed squarely at fans of dodgy 'cult' sci-fi and horror movies, weird stuff with mutations and splatter and science-gone-wrong. Certain TV shows come to mind too. *The Twilight Zone*. *The X-Files*. Or *Stranger Things* maybe. It certainly is strange. You also need to enjoy a good laugh because it is a comedy. A dark comedy really. Plus you need to appreciate British humour. Or at least not get wound up by it. I mean, it's not a movie or a TV show, obviously. You won't find it on Netflix. It's a book. You have to enjoy reading too. Sound like you?

In the Zone Oct 28 2022 *The Twilight Zone* explores the possibilities inhering in the ordinary. A *Twilight Zone* episode can move us by being poignant and intimate, rambunctious or thought provoking. It can also be orchestrated as a set of intertwined plot developments or as a serial progression. But regardless of whether it takes place on an asteroid, in a city pool room, or in the backwoods, it will usually convey both a folklorist's eye for detail and the born raconteur's sense of pace. Rod Serling, the show's founder, main scriptwriter, and artistic director, knew how much

burden he could place on his rhetorical and dramatic gifts. Deservedly celebrated as a pioneer in TV science fiction, he also writes about history and loyalty, the grip of everyday reality, and the dangers of both forgetting about one's ghosts and giving them the upper hand.

Solar-Terrestrial Physics/1970 Nov 24 2019

This volume contains the review papers presented at the International Symposium on Solar-Terrestrial Physics held at the Tavrishesky Palace, Leningrad, U.S.S.R., 11-19 May 1970. The Symposium may be

regarded as the most recent member of a series of international symposia - for instance, the Symposium on Solar-Terrestrial Physics, Belgrade (1966), the Joint IQSY-COSPAR Symposium on Solar-Terrestrial Physics, London (1967), and the Symposium on the Physics of the Magnetosphere, Washington (1968). Like those earlier symposia, the Leningrad Symposium was sponsored by the International Astronomical Union (IAU), the International Union of Geodesy and Geophysics (IUGG), the International Union of Radio Sciences (URSI), and the ICSU Committee on Space Research (COSPAR). These bodies are all concerned with one or another aspect of solar-terrestrial physics, and all joined in believing that the time was ripe for another comprehensive symposium on all aspects of this very active field of research.

Twilight Zone Encyclopedia

Jul 25 2022

Since its 1959 debut, *The Twilight Zone* has been an indelible part of the American cultural fabric and remains one of TV's most influential series. Assembled with the full cooperation of the Rod Serling estate, this fact-filled collectible includes biographies of every principal actor involved in the series, and detailed descriptions of the characters they played. The hundreds who toiled behind the scenes—producer, writers, and directors—enjoy a place of equal prominence. *The Twilight Zone Encyclopedia* is two books in one: an episode-by-episode guide and a compendium of credits, plot synopses, anecdotes, production details, never-before-seen images, and interviews with nearly everyone still alive who was associated with the show.

Psychological Healing Through Creative Self-

Understanding and Self-Transformation Apr 21 2022

This book focuses on the development of psychological self-understanding, healing psychologically painful inner conflicts, and the basis of psychological and spiritual fulfillment. Readers will discover a new understanding of effective psychotherapy, groundbreaking diagnostic psychological testing research, and the distinction between the ego self-concept, the experiential self, and the transpersonal self (the real self, the relational self, or the holistic self). It also clarifies aspects of optimal psychological health, such as authenticity, sincerity, integrity, creativity, intuition, empathy, courage, strength of character, inspiration, unselfish love (or warmhearted caring), emotional security, inner wholeness, vitality, and fulfillment. Principles of psychological healing and self-transformation can enhance the development of

interpersonal relationships, as well as facilitate effective and fulfilling ways of living in society. The authors deeply explored their own psychological pain and experiential truth to write this book, so readers can achieve greater self-understanding, fulfillment, and liberation from psychological pain.

Jock Mahoney Dec 06 2020

Iowa-born Jock Mahoney was an elite athlete and U.S. Marines fighter pilot prior to falling into a film career. He is

widely considered to be one of the greatest stuntmen in movie history, having taken leaps and bounds for Errol Flynn, John Wayne, Randolph Scott, and Gregory Peck. One of the first stuntmen to successfully move into acting, he was the popular star of the 1950s television westerns *Range Rider* and *Yancy Derringer* and twice played Tarzan on the big screen, presenting a memorable portrayal of an educated, articulate and mature jungle lord true to author Edgar Rice Burroughs' original vision. Filming in real jungles around the world took a physical toll on Mahoney that transformed him from leading man to burly character actor. He had to overcome the effects of a stroke but true to his tough guy nature rose above it to resume his life's many adventures. Mahoney was beloved by fans at conventions and appearances until his untimely demise in 1989 from a stroke-caused motor vehicle accident.
