African Journal of Reproductive Health (AJRH) is a multidisciplinary and international Journal published quarterly (March, June, September, and December) by the Women's Health and Action Research Centre (a non-governmental organization with headquarters in Nigeria). The publication of the journal started in 1997. As of September 2013, 54 editions have been published. The journal focuses on publishing original research, comprehensive review articles, short reports and commentaries on reproductive health in Africa. It strives to provide a forum for both African and foreign authors working in Africa to share findings about all aspects of reproductive health and also to disseminate innovative, relevant, and useful information on reproductive health throughout the continent. A definitive guide and essential reference for anyone writing software for the Macintosh, Inside Macintosh X-Ref provides programmers with a quick and easy way to find the exact information they need. It features a complete index of all the books in the 26-volume Inside Macintosh series--and an index of all the key topics listing the volume the topic is covered in, plus chapter and page number. Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database. The refereed proceedings of the 9th International Conference on User Modeling, UM 2003, held in Johnstown, PA, USA in June 2003. The 20 revised full papers and 28 revised poster papers presented together with 12 abstracts were carefully reviewed and selected from 106 submissions. The papers are organized in topical sections on adaptive hypermedia, adaptive Web, natural language and dialogue, plan recognition, evaluation, emerging issues of user modeling, group modeling and cooperation, applications, student modeling, learning environments - natural language and paedagogy, and mobile and ubiquitous computing. Endohedral fullerenes represent a novel family of carbon nanostructures, which are characterized by a robust fullerene cage with atoms, ions, or clusters trapped in its interior. Since the first separation of the endohedral metallofullerene La@C82 in 1991, a large variety of endohedral structures have been isolated and their endohedral nature has been proved by experimental studies. Within the past two decades, the world of endohedral fullerenes was significantly enlarged by the clusterfullerenes and the new carbon cages including non-IPR (IPR=isolated pentagon rule) structures. Resulting from the charge transfer from the encaged species to the fullerene cage, endohedral fullerenes hold a lot of fascinating properties inaccessible by the empty fullerenes, and consequently promise potential applications in biomedicine, molecular electronics and photonics etc. The book provides a comprehensive overview of endohedral fullerenes focused on the new advances in the past decade, including its fundamentals (structures), synthesis, isolation, characterization, properties, functionalization as well as the applications, thus representing the most updated and broad review of this exciting field. Contents: The Early Days of Metallofullerene Research (Hisanori Shinohara) Synthesis and Isolation of Endohedral Fullerenes — A General Review (Fupin Liu, Jian Guan, Tao Wei, Song Wang and Shangfeng Yang) Crystallographic Study of Endohedral Metallofullerenes (Yun-Peng Xie, Shasha Zhao and Xing Lu) Metal Nitride Clusterfullerenes — New Advances and Challenges (Tao Wei, Song Wang, Fupin Liu, Jian Guan, Alexey A Popov, Lothar Dunsch and Shangfeng Yang) Metal Carbide Clusterfullerenes (Taishan Wang and Chunru Wang) The Discovery of Non-IPR Fullerenes (Wei Xu, Chunying Shu and Chunru Wang) Metal Oxide Clusterfullerenes (Steven Stevenson) Nitrogen Atom-Based Endohedral Fullerenes and Potential Applications (B J Farrington and K Porfyrakis) Noble-Gas Fullerenes (R James Cross, Jr) Electrochemical Properties of Endohedral Metallofullerenes (Luis Echegoyen, Frederic Melin and Manuel N Chaur) Chemical Functionalization of Endohedral Metallofullerenes (Yutaka Maeda) Computational Studies of Endohedral Fullerenes: Bonding, Isomerism, Internal Dynamics, Spectroscopy, and Chemical Reactivity (Alexey A Popov) Biomedical Applications of Trimetallic Nitride Endohedral Metallofullerenes (Jianyuan Zhang, Boris M Kiselev, Youqing Ye and Harry C Dorn) Higher LUMO Level Endohedral Fullerene and Fullerene Bisadduct Acceptors for Polymer Solar Cells (Yongfang Li) Readership: Advanced undergraduates and graduate students, scientists in Chemistry, Physics, and Materials Science, researchers and professionals in the fields

of fullerenes and all-carbon nanomaterials, and the general public. Keywords: Fullerenes; Carbon Nanostructures; Endohedral Fullerenes; Metallofullerenes; Clusterfullerenes; Isomers; Charge Transfer; MRI Contrast Agents

**Key Features:** Our book presents the most updated and complete review of the exciting field of endohedral fullerenes, covering all aspects from fundamental to applications. A full spectrum of related topics were included, especially the non-IPR (IPR=isolated pentagon rule) structures (one of the most intriguing structures providing important insights to the formation mechanism) and photovoltaic applications (one of the most promising applications) of endohedral fullerenes, which are not found in the existing publications. Several prominent contributors were included in our book, such as Profs. L Echegoyen (Robert A Welch Professor of University of Texas at El Paso), H Shinohara (Dean of the School of Science, Nagoya Univ.), H Dorn (Director of Carbonaceous Nanomaterials Center, Virginia Tech.) etc.

**Reviews:** "I recommend this up-to-date, comprehensive volume to researchers and professionals working with fullerenes and carbon nanomaterials as well as to advanced undergraduate and graduate students and the more general reader interested in this relatively new exciting field with myriad potential applications." *Chemistry & Industry* "The editors have done excellent work in compiling this book. As a whole, it is an invaluable source for all advanced undergraduates and graduate students, scientists in Chemistry, Physics, and Materials Science, researchers and professionals who are interested in endohedral fullerenes and all-carbon nanomaterials. It provides the most up-to-date survey of the area, and is highly recommended." The main purpose of the present book is to broaden the scope of research on the development of intercultural communicative competence. Bearing this purpose in mind, English learners are considered as intercultural speakers who share their interest for engaging in real life communication. According to Byram and Fleming (1998), the intercultural speaker is someone with knowledge of one or more cultures and social identities, and who enjoys discovering and maintaining relationships with people from other cultural backgrounds, although s/he has not been formally trained for that purpose. Besides, possessing knowledge of at least two cultures is the case of many learners in bilingual or multilingual communities. In these contexts, the objective of language learning should then focus on developing intercultural competence, which in turn may involve promoting language diversity while encouraging English as both a means and an end of instruction (see Alc3n, this volume). This is the idea underlying the volume, which further sustains Kramsch's argument (1998) against the native/ non-native dichotomy. Following that author, we also believe that in a multilingual world where learners may belong to more than one speech community, their main goal is not to become a native speaker of English, but to use this language as a tool for interaction among many other languages and cultures.
