Aviation Security Aug 17 2022 and baggage for items that could pose a threat at nearly 440 airports across the country. One way TSA and the Department of Homeland Security (DHS) Office of Inspector General (OIG) measure TSO performance is through covert testing of TSA screening operations. In response to the findings from recent DHS OIG covert testing, the Secretary of DHS directed TSA in June 2015 to conduct further training for all TSOs and supervisors. GAO was asked to review TSA's efforts to train and test TSOs. This report examines (1) how TSA trains TSOs and evaluates the training; (2) how TSA measures TSO performance and what the data show; and (3) to what extent TSA uses TSO performance data to enhance TSO performance. GAO analyzed TSO performance data from 2009 through 2015, reviewed documents regarding TSA training and testing, and interviewed TSA officials at headquarters and 10 airports. GAO selected these airports based on airport risk categories, among other things. Information from these airports was not generalizable, but provided insights into TSO training and testing. This is a public version of a sensitive report that GAO issued in May 2016.

Challenges for Language Education and Policy Jun 22 2020 Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on language users, the 'people.' Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy, whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think "out of the box" and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and languaging on individual language users rather than on the masses.

Development and Field Testing of Multiple Deployment Model Pile (MDMP) Jan 30 2021 A model pile is a calibrated tool equipped with instrumentation capable of monitoring the pile/soil interaction over the pile history. Monitoring includes the installation, pore pressure dissipation combined with consolidation and soil pressure equalization, and ultimately the pile behavior under loading and failure. The model pile installation and soil structure interaction simulate the actual field conditions of full-scale piles. As such, the obtained information can be utilized directly (e.g., skin friction) or extrapolated (e.g., pore pressure dissipation time) to predict the soil's response during full-scale installation. The Multiple Deployment Model Pile (MDMP) was developed as an in situ tool for site investigations.

Adaptive and Natural Computing Algorithms Jan 10 2022 The ICANNGA series of Conferences has been organised since 1993 and has a long history of promoting the principles and understanding of computational intelligence paradigms within the scientific community and is a reference for established workers in this area. Starting in Innsbruck, in Austria (1993), then to Ales in France (1995), Norwich in England (1997), Portoroz in Slovenia (1999), Prague in the Czech Republic (2001) and finally Roanne, in France (2003), the ICANNGA series has established itself for experienced workers in the field. The series has also been of value to young researchers

wishing both to extend their knowledge and experience and also to meet internationally renowned experts. The 2005 Conference, the seventh in the ICANNGA series, will take place at the University of Coimbra in Portugal, drawing on the experience of previous events, and following the same general model, combining technical sessions, including plenary lectures by renowned scientists, with tutorials.
