as guided meditations, transformative breathwork, and journaling prompts"--

**Feminist Activist Ethnography** Nov 17 2019 Writing in the wake of neoliberalism, where human rights and social justice have increasingly been subordinated to proliferating "consumer choices" and ideals of market justice, contributors to this collection argue that feminist ethnographers are in a key position to reassert the central feminist connections between theory, methods, and activism. Together, we suggest avenues for incorporating methodological innovations, collaborative analysis, and collective activism in our scholarly projects. What are the possibilities (and challenges) that exist for feminist ethnography 25 years after initial debates emerged in this field about reflexivity, objectivity, reductive individualism, and the social relevance of activist scholarship? How can feminist ethnography intensify efforts towards social justice in the current political and economic climate? This collection continues a crucial dialog about feminist activist ethnography in the 21st century—at the intersection of engaged feminist research and activism in the service of the organizations, people, communities, and feminist issues we study.

**Legends in Gandhian Social Activism: Mira Behn and Sarala Behn** Aug 27 2020 This book is about Madeleine Slade (1892-1982) and Catherine Mary Heilemann (1901-1982), two English associates of Mohandas K. (Mahatma) Gandhi (1869-1948), known in India as Mira Behn and Sarala Behn. The odysseys of these women present a counternarrative to the forces of imperialism, colonialism, capitalism, and globalized development. The book examines their extraordinary journey to India to work with Gandhi and their roles in India's independence movement, their spiritual strivings, their independent work in the Himalayas, and most importantly, their contribution to the evolution of Gandhian philosophy of socio-economic reconstruction and environmental conservation in the present Indian state of Uttarakhand. The author shows that these women developed ideas and practices that drew from an extensive intellectual terrain that cannot be limited to Gandhi's work. She delineates directions in which Gandhian thought and experiments in rural development work and visions of a new society evolved through the lives, activism, and written contributions of these two women. Their thought and practice generated a new cultural consciousness on sustainability that had a key influence in environmental debates in India and beyond and were responsible for two of the most important environmental movements of India and the world: the Chipko Movement or the movement against commercial green felling of trees by hugging them, and the protest against the Tehri high dam on the Bhagirathi River. To this day, their teachings and philosophies constitute a useful and significant contribution to the search for and implementation of global ideas of ecological conservation and human development.

**Religion and Progressive Activism** Nov 29 2020 "To many mainstream-media saturated Americans, the terms 'progressive' and 'religious' may not seem to go hand-in-hand. As religion is usually tied to conservatism, an important way in which religion and politics intersect is being overlooked. [This book] focuses on this significant intersection, revealing that progressive religious activists are a driving force in American public life, involved in almost every political issue or area of public concern. This volume brings together [contributors] who dissect and analyze the inner worlds and public strategies of progressive religious activists from the local to the transnational level. It provides insight into documented trends, reviews overlooked case studies, and assesses the varied ways in which progressive religion forces us to deconstruct common political binaries such as right/left and progress/tradition...[This] book engages and rethinks long accepted theories of religion, of social movements, and of the role of faith in democratic politics and civic life."--

*The Limits of Civic Activism* May 24 2020 Today's political climate overflows with admonitions to "get involved," as if entering the political fray is the great cure-all for almost any conceivable social problem. This advice may be a recipe for disaster. Staying out of politics is sometimes wiser. Pursuing non-political options may even be best given the inherent difficulties of the political pathway. In this volume, Robert Weissberg offers a corrective to a view that has evolved into a civic religion. A nearly missionary flavor infuses the very notion of political activism, and it is especially prevalent among those on the ideological spectrum's left, though hardly unknown among conservatives. Getting involved, it is said, will do everything from improve our education to make us healthier (or, for conservatives, reduce immorality). This benefit is grossly oversold, especially given our gridlock-mired political system, one that greatly limits what can be accomplished. Even the most worthy causes face stiff opposition, and for every winner, there are countless losers. Academics in particular have promoted politics as the great remedy for social and economic ills, but this prescription rests on flawed, often myopic research that may have a hidden (liberal statist) ideological agenda. We cannot safely assume that those befuddled by economic tasks will eventually become adroit political players. Furthermore, research often demonstrates zero about political progress that results from political activism, though it persuasively asserts that such gains have been made. Scholars also forget that most goals that can be pursued in the civic realm can also be sought through private channels. Millions of parents, for example, have secured better educations for their children simply by abandoning public education, not battling "the system." This volume constitutes both a powerful challenge to the dogma that political activism is an unqualified good, and a strong case that in many instances following the

private route may be the superior option. It will be of interest to political scientists, sociologists, and students of public policy. *Dancing in the Shadow of Tyranny* Feb 19 2020 *Dancing in the Shadow of Tyranny* is a moving social testament for our times. The author, Neriah Lothamer, has been involved in many forms of activism, from the Kent State student protests to the Vietnam war, to the most recent marches opposing the Iraq war. He has videotaped and documented the outrage felt by many activists. What makes this book unique is that Lothamer does not simply turn the searchlight on corporate corruption and government folly. He turns an equally probing eye on himself. He asks, where do the roots of such social behavior lie, and he is shocked to find echoes of it resounding in his own behavior, toward his children, his wife, his business partners. He realizes that externalizing such behavior in order to confront it in the other may be little more than a distraction from the work at hand: confronting the inner bully and tyrant. Written in deeply moving and lyrical prose-sometimes searing, sometimes singing-Lothamer's moving story of heartbreak and radical inner reconstruction is a full of insights and compelling contemporary wisdom.

**Mexican American Women Activists** Apr 22 2020 When we see children playing in a supervised playground or hear about a school being renovated, we seldom wonder about who mobilized the community resources to rebuild the school or staff the park. *Mexican American Women Activists* tells the stories of Mexican American women from two Los Angeles neighborhoods and how they transformed the everyday problems they confronted into political concerns. By placing these women's experiences at the center of her discussion of grassroots political activism, Mary Pardo illuminates the gender, race, and class character of community networking. She shows how citizens help to shape their local environment by creating resources for churches, schools, and community services and generates new questions and answers about collective action and the transformation of social networks into political networks. By focusing on women in two contiguous but very different communities -- the working-class, inner-city neighborhood of Boyle Heights in Eastside Los Angeles and the racially mixed middle-class

suburb of Monterey Park -- Pardo is able to bring class as well as gender and ethnic concerns to bear on her analysis in ways that shed light on the complexity of mobilizing for urban change. Unlike many studies, the stories told here focus on women's strengths rather than on their problems. We follow the process by which these women empowered themselves by using their own definitions of social justice and their own convictions about the importance of traditional roles. Rather than becoming political participants in spite of their family responsibilities, women in both neighborhoods seem to have been more powerful because they had responsibilities, social networks, and daily routines separate from the men in their communities. Pardo asserts that the decline of real wages and the growing income gap means that unfortunately most women will no longer be able to focus their energies on unpaid community work. She reflects on the consequences of this change for women's political involvement, as well as on the politics of writing about women and politics.

*How Quantum Activism Can Save Civilization* Mar 14 2022 Beginning with *Taking the Quantum Leap* by Fred Alan Wolf, there have been a number of books that have created new paradigms for integrating science and spirituality. These books have been long on theory and short on application. This work represents something completely different for this genre. In his previous book, *God is Not Dead*, Goswami proved that not only are science and religion compatible, but that quantum physics proves the existence of God. In this new book, Goswami moves beyond theory into the realm of action. He asserts that quantum thinking is striking the death blow to scientific materialism; that quantum thinking allows us to break from past bad habits and bring us into a world of free will and possibilities. Beginning with the question: "God is here, so what are you going to do about it?" Goswami calls for a plan of action that involves applying "quantum thinking" to a variety of societal issues. He issues a call for a spiritual economics that is concerned with our well-being rather than only our material needs; democracy that uses power to serve, instead of dominating others; education that liberates rather than shackles; and new healthy practices that restore wholeness.

*Power Interrupted* Jan 20 2020 In *Power Interrupted*, Sylvanna M. Falcone redirects the conversation about UN-based feminist activism toward UN forums on racism. Her analysis of UN antiracism spaces, in particular the 2001 World Conference against Racism, Racial Discrimination, Xenophobia, and Related Intolerance in Durban, South Africa, considers how a race and gender intersectionality approach broadened opportunities for feminist organizing at the global level. The Durban conference gave feminist activists a pivotal opportunity to expand the debate about the ongoing challenges of global racism, which had largely privileged men's experiences with racial

injustice. When including the activist engagements and experiential knowledge of these antiracist feminist communities, the political significance of human rights becomes evident. Using a combination of interviews, participant observation, and extensive archival data, Sylvanna M. Falcon situates contemporary antiracist feminist organizing from the Americas—specifically the activism of feminists of color from the United States and Canada, and feminists from Mexico and Peru—alongside a critical historical reading of the UN and its agenda against racism.

*Sitting Still* Jul 06 2021 Many people feel an urgency to speak up for the changes they want to see in their world. Most of these activists wouldn't immediately connect their efforts with meditation. Some social activists may want to learn how to meditate, but don't know how to start to simply sit still. Author Jan Bidwell has worked for change for forty years. As a daily meditator she knows the power of meditation to strengthen a person to work as a political and social activist. In thirty years of teaching meditation, she knows the powerful impact meditation can have for people facing hard realities. Through concrete examples Bidwell shows how the political activist can strengthen and empower their mission by developing a regular practice of sitting still.

**Generation Y, Spirituality and Social Change** Jan 12 2022 Young people are doing faith differently. They are redefining community, ministry and ritual for a new era. In the face of planetary crisis, the next generation no longer see faith as a private matter, instead they are integrating it with activism and the need for systemic change. Influenced by the wealth of different teachings and traditions available around them, their identities are increasingly multifaceted and emphatically global. This collection of stories and interviews with young adults and their allies explores this new landscape, reflecting both the energy and inspiration of the next generation and the tremendous challenges they face. It points towards an exciting evolution in the way we are relating to the sacred.

**The Hope** Feb 01 2021 The Honeymoon Effect: A state of bliss, passion, energy, and health resulting from a huge love. Your life is so beautiful that you can't wait to get up to start a new day and you thank the Universe that you are alive. Think back on the most spectacular love affair of your life—the Big One that toppled you head over heels. For most, it was a time of heartfelt bliss, robust health, and abundant energy. Life was so beautiful that you couldn't wait to bound out of bed in the morning to experience more Heaven on Earth. It was the Honeymoon Effect that was to last forever. Unfortunately for most, the Honeymoon Effect is frequently short-lived. Imagine what your planetary experience would be like if you could maintain the Honeymoon Effect throughout your whole life. Bruce H. Lipton, Ph.D., bestselling author of *The Biology of Belief*, describes how the Honeymoon

Effect was not a chance event or a coincidence, but a personal creation. This book reveals how we manifest the Honeymoon Effect and the reasons why we lose it. This knowledge empowers readers to create the honeymoon experience again, this time in a way that ensures a happily-ever-after relationship that even a Hollywood producer would love. With authority, eloquence, and an easy-to-read style, Lipton covers the influence of quantum physics (good vibrations), biochemistry (love potions), and psychology (the conscious and subconscious minds) in creating and sustaining juicy loving relationships. He also asserts that if we use the 50 trillion cells that live harmoniously in every healthy human body as a model, we can create not just honeymoon relationships for couples but also a "super organism" called humanity that can heal our planet.

*Green Inside Activism for Sustainable Development* Nov 22 2022 This book considers how public sector institutions can be transformed to better support sustainable development by exploring the concept of green inside activism and its importance for institutional change. The phenomenon of inside activism has been shown to be crucial for green policy change and this book focuses on public officials as green inside activists, committed to green values and engaged in social movement, acting strategically from inside public administration to change public policy and institutions in line with such value commitment. The book theorizes how green inside activism can contribute to a more sustainable development through institutional change. This theorizing builds on and relates to highly relevant theoretical arguments in the existing literature. The authors also consider the legitimacy of inside activism and how it can be reconciled with democratic ideals. This innovative work will appeal to students and scholars of public policy, political science and environmental politics.

**Political Activists in America** Dec 19 2019 "Argues that active involvement in politics can be deeply fulfilling to the individual, and that the construction of identity for all activists is both about morality and about what one wants for oneself. Includes interviews with environmental, social justice, and pro-life activists"--Provided by publisher.

**Spiritual Activism** Jun 17 2022 Steve Jobs and others like him teach us about a higher or inner knowledge and about the use of spiritual keys for success. These keys work because they are linked to universal laws that govern our universe regardless of whether we choose to learn and live by them or not. Our actions all have consequences. People who choose to recognize the consequence of success use keys governed by basic physics. They consciously choose actions according to notions of principles. Wanda Krause calls people who have learned these keys or principles, and actively use them, spiritual activists. In her book, *Spiritual Activism: Keys for Personal and Political Success*, Krause provides 12 keys for success that

include principles taught by mystics and are grounded in physical laws of the universe. Through observations, interviews, and direct participation with hundreds of activists over a 12-year period, she has found their challenges are becoming more and more complex, yet they are still able to discover keys to success no matter what country they are in, the various aspects of the culture around them, or the particular challenges they face. Krause presents ten activists' stories to show how they achieve real success. Themes include overcoming personal challenges, such as substance abuse or cancer, creating true miracles, entrepreneurship, service after a life of abandonment, post-war peace, politics around new environmental threats, terrorism, politics around nuclear programs, lessons from the Arab Spring, compassionate justice and a new world economic system. The activists provide awareness of their concerns while they provide guidance and examples using spiritual keys. For Krause, whether struggles are considered personal or political they are all embedded in power dynamics that must be transformed, and it is her belief that spiritual activism is the only sustainable way forward. It is important to note not all of those she identifies in her book as spiritual activists affirm a religious belief - some are atheists, some are agnostic - the important message here is these are imperfect beings that truly align their goals with conscious duty and purpose with a strong inner calling and principled action. Spiritual Activism offers the essential keys to success, with success defined as achieving all that is going to help readers live with purpose. These 12 keys include: Living Your Purpose Spiritual Intelligence Energy Vibrations Interdependence The Law of Attraction Purification Developing Your Whole Self Beliefs of the Mind The Law of Love Intention for Manifestation Prayer Faith in the Divine Readers will easily identify with the spiritual activists in Krause's book; there is nothing otherworldly or extraordinary about them other than their chosen commitment to lead a life filled with meaning and, as a result, they are helping to change the world for the betterment of everyone.

**Performance and Activism** May 04 2021 This book is a study of grassroots performances and activism in the aftermath of the 1992 Los Angeles riots, documenting efforts toward establishing truce between warring street gangs, networks of support by mothers of incarcerated youth, and the theatrical production of Anna Deavere Smith's *Twilight: Los Angeles 1992*. It situates these developments in the inter-disciplinary context of performance studies rooted in the history and political economy of Los Angeles.

**Mystical Activism** Jun 24 2020 In *Mystical Activism*, we each hold the power to change the world right where we are. To call these "end times" is not hyperbole. We are in trouble and the signs are everywhere: extreme political divisions; xenophobic violence; enormous wealth inequity; poverty

and homelessness; racism, sexism, and ageism; arms buildups and unending wars; and, most critical of all, terrifying climate disruption associated with man-made global warming. We are the cause of these dark times. Driven by left-brain beliefs, illusions and obsessions, humanity races headlong toward the collapse of civilization. Fortunately, the solution to these mounting crises also lies in the human psyche, arising from a most surprising source: the right-brain's natural mystical consciousness. Our survival depends on whether we grasp and resolve this paradox in time.

The Conscious Activist Dec 23 2022 Award-winning author James O'Dea has created a handbook for those interested in Sacred Activism, a fusing spiritual knowledge with radical action. O'Dea outlines the polarities between the inner path of spiritual growth and the outer path of social activism, concluding that the two must co-exist in equal weighting so that the human race can become a compassionate force for good. 'James O'Dea

is a modern-day prophet who has journeyed further than anyone I know in the ways of peace' Lynne Twist 'The Conscious Activist is a major contribution to the most important movement of our time - one that fuses profound spiritual awareness with radical action. It is wise and passionate and superbly written, with the kind of graceful but pungent clarity that only long experience can engender' Andrew Harvey 'After reading The Conscious Activist, you will drop to your knees in heart-opening awe and then you will rise to your feet, inspired to act in a truly transformational way' Marianne Williamson An extraordinary and rousing manifesto from award-winning author James O'Dea, The Conscious Activist is both a compelling narrative and a deep reflection on the demands of mystical realization and effective activism. Throughout the book, O'Dea poses that an integration of the two has the power to permanently transform the social order and to wake up humanity from its course of rapid self-destruction. Divided into two parts, Part I offers parallel narratives of author James O'Dea's training and spiritual development as both a mystic and an activist. The mystic, he explains, must move past petty ego concerns in order to experience oneness with each other and our divine source. The activist, on the other hand, explores the role of passion and conscience in activating social change. In Part II, O'Dea pursues this fascinating concept of a meeting ground between the two worlds, where spirituality and action unite to spark an accelerated transition towards our greater goal: a more evolved civilization. He asks us all to become conscious activists - to learn, collectively, how to move beyond our rigid conformity to beliefs of the past and its archaic structures of power and control.

Human Welfare, Rights, and Social Activism Mar 22 2020 J.S. Woodsworth, a founding member and leader of the Cooperative Commonwealth Federation (forerunner of the New Democratic Party) and member of Parliament, was a social policy pioneer who promoted human welfare and rights over interests of property and finance. Human Welfare, Rights, and Social Activism explores the significance of Woodsworth's thoughts and achievements in the area of human rights in the light of current social welfare objectives and practices. Canadians continue to grapple with the question of how to accommodate and reconcile social diversity and difference while articulating a common interest and advancing human rights, both domestically and internationally. The essays in this volume, by an interdisciplinary group of scholars, address such issues as globalization, labour rights and law, the gendered and racialized dimensions of transnational labour, the relationship between human rights, social programs, and social rights, and the emergent cultural politics of difference. Through engagement with longstanding debates on the ideals and provisions for social justice we have come to

associate with Woodsworth, the essays consider the present significance of a human rights frame, and examine the historical and contemporary exclusions to polity that occur around gender, ethnicity, class, and race.

*Subtle Activism* Jan 24 2023

*Subtle Activism* Feb 25 2023 Explores whether consciousness-based practices like meditation and prayer can contribute to social change. Can awakened consciousness contribute to social change and, if so, how? David Nicol introduces the concept of “subtle activism” to describe the use of consciousness-based practices like meditation and prayer to support collective transformation, such as global meditation directed toward peaceful resolution of a conflict. Subtle activism represents a bridge between the consciousness movement and the movements for peace, environmental sustainability, and social justice. It is not a substitute for physical action but rather a potentially crucial component of a more integrated approach to social change. Although ancient lore is rife with tales of shamans and adepts intervening on spiritual levels for the benefit of humanity, this book is the first comprehensive treatment of this topic. Nicol grounds his consideration in the available scientific research and in dialogue with a broad range of thinkers in the fields of consciousness studies, transpersonal theory, and New Paradigm thought. David Nicol teaches in the Philosophy, Cosmology, and Consciousness Program at the California Institute of Integral Studies. He is also executive director and cofounder of the Gaiafield Project and cofounder of BeThePeace.

*The Conscious Activist* Nov 10 2021 An extraordinary and rousing manifesto from award-winning author James O'Dea, *The Conscious Activist* is both a compelling narrative and a deep reflection on the demands of mystical realization and effective activism. *A New Republic of the Heart* Sep 27 2020 A vision to address our environment, economy, politics, culture, and to catalyze the radical whole-system change we need now Recasting current problems as emergent opportunities, Terry Patten offers creative responses, practices, and conscious conversations for tackling the profound inner and outer work we must do to build an integral future. In practical and personal terms, he discusses how we can all become active agents of a transformation of human civilization and why that is necessary to our continued survival. Patten's narrative focuses on two aspects of existence--our dynamic but fractured and threatened world, and our underlying wholeness and unity. Only by honoring both of these realities simultaneously can we make sustainable changes in ourselves, our communities, our body politic, and our planetary life-support system. *A New Republic of the Heart* provides a comprehensive understanding and inspiring vision for "being the change" in a way that can address the most intractable problems of our time. Patten shows how we can come together in our communities for conversations that matter and describes new communities, enterprises, and forms of dialogue that integrate both inner personal growth work with outer awareness, activism, and service.

*Varieties of Russian Activism* Jun 05 2021 Despite decades under Putin's rule, it is too simplistic to assert that authoritarianism in Russia has eliminated activism, especially in relation to everyday life. Instead, we must build an awareness of diverse efforts to mobilize citizens to better understand how activism is shaped by and, in turn, shapes the regime. *Varieties of Russian Activism* focuses on a broad range of collective actions addressing issues from labor organizing to housing renovation, religion,

electoral politics, minority language rights, and urban planning. Contributors draw attention to significant forms of grassroots politics that have not received sufficient attention in scholarship or that deserve fresh examination. The volume shows that Russians find novel ways to redress everyday problems and demand new services. Together, these essays interrogate what kinds of practices can be defined as activism in a fast-changing, politically volatile society. An engaging collection, *Varieties of Russian Activism* unites leading scholars in the common aim of approaching the embeddedness of civic activism in the conditions of everyday life, connectedness, and rising society-state expectations.

Radical Regeneration Apr 03 2021 • Explores how Sacred Activism--specifically, creative, wise, sacredly inspired action--offers an antidote to the crises facing our world • Reveals how to uncover and sustain joy and how to use it as fuel for continuing Sacred Activism in dangerous times • Includes practical maps of the dark night process and of the four-part path to transfiguration drawn from the secret depths of the mystical traditions Presenting a manual for navigating humanity's collective dark night, Andrew Harvey and Carolyn Baker explore potential antidotes, drawn from mystical traditions and Sacred Activism, to help us find inspiration and take action in the face of the daunting challenges to our world. Offering a deep discussion of our global dark night in terms of the Kali Yuga, the authors examine the dangers of a growing constellation of intractable crises--authoritarianism both in America and abroad, climate change, economic inequality, social upheaval, and spiritual malaise. They then explore the antidotes to these crises: Sacred Activism--specifically, creative, wise, sacredly inspired action--and a profound understanding of our evolutionary ordeal and its potentialities. Examining the power of joy to help enact personal and planetary transformation, they explain how joy, or ananda, is a force all mystical traditions recognize as the essence of the Divine. They reveal how to uncover and sustain joy in ourselves and how to use joy as fuel for continuing Sacred Activism in dangerous times. Drawing on the visionary teachings of mystics such as Pierre Teilhard de Chardin and Sri Aurobindo, the authors show how the global dark night is part of an evolutionary mutation process and how its very intensity makes it the potential seedbed of a new embodied, divine humanity. They offer practical maps of the crises, of the shadows that this global dark night is casting, and of the four-part path to transfiguration drawn from mystical traditions. Sharing a vision of a new and focused global moment of love in action, the authors reveal that apocalypse is not inevitable--if enough people awaken to the extraordinary possibilities of Sacred Activism.
