The book covers all the aspects of theory, analysis, and design of Electron Devices and Circuits for the undergraduate course. The concepts of p-n junction devices, BJT, JFET, MOSFET, electronic devices including UJT, thyristors, IGBT, Amplifier circuits-BJT, JFET and MOSFET amplifiers, multistage and differential amplifiers, feedback amplifiers, and oscillators are explained comprehensively. The book explains various p-n junction devices, including diode, LED, laser diode, Zener diode, and Zener diode regulator. The different types of rectifiers are explained in support. The book covers the construction, operation, and characteristics of BJT, JFET, MOSFET, UJT, Thyristors - SCR, Diac and Triac, and IGBT. It explains the biasing of BJT, JFET, and MOSFET amplifiers, basic BJT, JFET, and MOSFET amplifiers with h-parameters and r-parameters equivalent circuits, multistage amplifiers, differential amplifiers, BiCMOS amplifier, single tuned amplifiers, neutralization methods, power amplifiers, and frequency response. Finally, the book incorporates a detailed discussion of the analysis of the current series, voltage series, current shunt, and voltage shunt feedback amplifiers. The book also includes the discussion of the Barkhausen criterion for oscillations and the detailed analysis of various oscillator circuits, including RC phase shift, Wien bridge, Hartley, Colpitt's, Clapp, and crystal oscillators. The book uses straightforward and lucid language to explain each topic. The book provides the logical method of describing the various complicated issues and stepwise methods to make understanding easy. The variety of solved examples is the feature of this book. The book explains the subject's philosophy, which makes understanding the concepts evident and makes the subject more interesting. The International Society for Arterial Chemoreception (ISAC) was founded in August 1988 during the 9th International Symposium on Arterial Chemoreception which was held at Park City, Utah, USA. ISAC was established with the aim of providing a framework to support the increasing number of investigators from a wide variety of disciplines (anatomists, pathologists, respiratory physiologists and clinicians, high altitude physiologists, biochemists, biophysicists, physiologists and pharmacologists) who share a common interest in arterial chemoreception. ISAC took over the co-ordination of the international chemoreceptor meetings, with the membership deciding the venue for forthcoming meetings. During the Park City symposium Dublin was selected to host the 1993 meeting, under the Presidency of Professor Ronan O'Regan. The 12th International Meeting on Arterial Chemoreception, which was held in Dublin in August 1993, was acclaimed as a great success by all those present. The delegates not only shared in a wide-ranging feast of chemoreceptor based science, they had plenty of opportunity during the meeting for renewing acquaintances and establishing new friendships. The location for the meeting at University College Dublin's modern Belfield campus helped to promote such interaction, and the social programme was outstanding. "This book is the third edition of What the Face Reveals, which was first published in 1997. Some pieces that appeared in previous editions have been preserved, while others were omitted to make room for new work. In the process of this revision, the editors came up with a new structure to the book, organized around substantive topic areas. There are seven sections. Section 1 on Animal FACS is one of the most compelling areas of new work on FACS. As of early 2018, FACS has been applied to 6 species: chimps, oranges, macaques, gibbons, dogs, horses, and cats automated measurement. Section 2 on Automated FACS Measurement is one area that has seen enormous growth in the research over the past two decades since the publication of the first edition of this book. Section 3 on Basic Affective Science contains four classic articles that used FACS to study spontaneous behavior. Section 4 contains four chapters on infant development. Section 5 on Pain contains a reprint one classic study by Craig and three new papers that use FACS to understand pain displays in a variety of contexts and populations. Section 6 on Psychopathology contains studies that use FACS to try to uncover and describe how observable facial behavior might distinguish among diagnostic groups. Finally, Section 7 on Social & Health Psychology contains articles that use FACS to study psychological process involved physical and psychological health, social behavior, and emotion"--

The Lloyd's Register of Shipping records the details of merchant vessels over 100 gross tonnes, which are self-propelled and sea-going, regardless of classification. Before the time, only those vessels classed by Lloyd's Register were listed. Vessels are listed alphabetically by their current name. In recent years, there has been a growing awareness of the multiple interrelationships between depression and various physical diseases. The WPA is providing an update of currently available evidence on these interrelationships by the publication of three books, dealing with the comorbidity of depression with diabetes, heart disease and cancer. Depression is a frequent and serious comorbid condition in diabetes, which adversely affects quality of life and the long-term prognosis. Co-occurrent depression presents peculiar clinical challenges, making both conditions harder to manage. Depression and Diabetes is the first book devoted to the interaction between these common disorders. World leaders in diabetes, depression and public health synthesize current evidence, including some previously unpublished data, in a concise, easy-to-read format. They provide an overview of the epidemiology, pathogenesis, medical costs, management, and public health and cultural implications of the comorbidity between depression and diabetes. The book describes how the negative consequences of depression in diabetes could be avoided, given that effective depression treatments for diabetic patients are available. Its practical approach makes the book ideal for all those involved in the management of these patients: psychiatrists, psychologists, diabetologists, general practitioners, diabetes specialist nurses and mental health nurses. For those wanting to become rapidly acquainted with specific areas of NMR, this title provides unrivalled scope of coverage. This issue of Radiation Medicine Rounds examines the latest advances in the use of radiation medicine in treatment of prostate cancer Prostate cancer is the most common cancer in males and radiation therapy is a major tool in the management of the disease. No other field requires such a protection of the tissue and such reliable hemostasis. No one will question that neurosurgery makes exceedingly high demands. However, the degree of the demands on the personal ity of the surgeon who has to carry out very serious operations to the exclusion of all others and has little opportunity to recover psycholog ically by working on simpler cases is concealed from the outer world. The mental strain which the coworkers and staff have to tolerate may not be denied". So wrote Wilhelm Tonnis in 1939. Although fifty years have now elapsed, his appraisal is still relevant today - hence my intention to discuss the everyday demands placed on neurosurgeons. My aim is not self-glorification to engender sympathy; rather it is to highlight the effects and repercussions of such demands for the well-being of the patients entrusted to us. The major onerous demands include: - those in the operating theater - those resulting from staff problems in nursing - those resulting from legal developments - those resulting from the increasing administrative tasks that cost valuable time and energy which are lost to our actual work in look ing after patients: science and research also suffer from this. I shall not go into the latter point within this preface. Let me first turn to the strains occurring in the operating theater. Written by a leader on the subject, Introduction to Geotechnical Engineering is first introductory geotechnical engineering textbook to cover both saturated and unsaturated soil mechanics. Destined to become the next leading text in the field, this book presents a new approach to teaching the subject, based on fundamentals of unsaturated soils, and extending the description of applications of soil mechanics to a wide variety of topics. This groundbreaking work features a number of topics typically left out of undergraduate geotechnical courses. Auto a due ruote del primo dopoguerra, bandiera della rivoluzione giovanile, acclamato simbolo di stile in equilibrio sulla tradizione. La Vespa è qualcosa di più che lo scooter più venduto nel mondo, o un significativo simbolo del design italiano: è un irripetibile fenomeno di costume che accompagna la nascita del Paese dal 1946 ad oggi. La storia di questo magico "tappeto volante" in Italia e nel mondo e l'esame dettagliato di numerosi modelli sono accompagnati da splendide fotografie originali. Edizione in lingua inglese. The Scooter Bible is an entertaining, colorful, and authoritative history of the little motorbikes that could. Beginning with the first motor scooter in 1902, Eric Dregni is your guide to everything from the postwar American scooter boom to the golden age of Italian and European scooters, the rise of Mod scooter culture in England . . . right up to modern electric scooters. Today, nostalgia for vintage Vespas, Piaggios, Cushman's, Lambrettas, and other top brands drive a new thirst for retro-inspired scooters in showrooms around the world. This revised and updated edition of The Scooter Bible brings the story up to date with the drive for zero emissions via electric vehicles. Throughout, author Eric Dregni offers you a wealth of imagery: historic black-and-white photos, evocative period advertisements, manufacturer photos, and more—over 500 images! Along the way, he also shows you scooter evolution, changing technologies, and scooter appearances in popular culture. And as the most comprehensive scooter book ever, The Scooter Bible also includes the world's most exhaustive encyclopedia of scooter brands, from Puddlejumper to Piaggio, Ducati to Doodlebug, and Zündapp Bella to Genuine Stella. The Scooter Bible is all you need before kick-starting your scooter engine to life and praying for ever more speed. Indeed, scooters are mechanical marvels on two wheels. Streamlined spuds. Mutant oddballs of Jet Age styling gone berserk. Innovative inventions shoehorned like sardines into miniaturized monocoque bodies. Engineering and styling enigmas (the stranger the better). They are the weird and the wonderful. And they are all here in The Scooter Bible. The guideline focuses specifically on evidence-based pharmacological treatments for AUD in outpatient settings and includes additional information on assessment and treatment planning, which are an integral part of using pharmacotherapy to treat AUD. Vespa ist für Motorroller längst so eine Art Gattungsbegriff geworden wie Tempo für Papiertaschentücher. Die Vespa - in all ihren vielen Versionen - war und ist günstiges Transportmittel, war und ist ein flottes Zeitgeismobil und hat schon früh Kultstatus erlangt. Seit 70 Jahren wird diese italienische Ikone nun schon gebaut, und Millionen hatten und haben ihre Freude an den agilen, schicken und sympathischen Rollern. Dieser Band zeigt alle Vespas aus sieben Jahrzehnten, vom Urtyp namens "Paperino" bis zu den aktuellen Sprint-, Primavera- und GTS-Modellen. Da dürfen natürlich die legendären Ape-Dreiräder nicht fehlen, und auch die Mofas und Mopeds wie die legendäre Ciao, die übrigen Piaggio-Roller wie der erste große namens Hexagon und der außergewöhnliche MP8 mit seinen beiden neigbaren Vorderrädern kommen zu Ehren. In the last decade, the significance of siblings in children's development and adjustment has been widely recognized, and research on brothers and sisters has increased dramatically. Bringing together exciting research on siblings by leading developmental psychologists and clinicians, this volume's contributions were originally presented at the First International Symposium on Siblings held in Leiden. This book focuses on both the significance of siblings as influences on individual development, and on the importance of the relationship in families with sick, disabled or troubled children. It covers the recent developmental research with chapters on the development of sibling relationships in early and middle childhood, the links between sibling relationships and those with parents, peers and friends, and the influence of siblings on children's adjustment. It then focuses on clinical issues such as siblings as sources of support for unhappy or sick children, or for children in disharmonious homes, and the vulnerability of siblings of disabled children. These clinical issues are discussed in practical terms by leading practitioners. Clear in presentation, comprehensive in its coverage of the exciting recent research, and full of practical insights, this volume brings to light important developmental principles, and raises questions regarding the assumptions about family processes and how different relationships within the family affect one another. For family researchers, those interested in the individual development of children, and for clinicians concerned about the impact of troubled or disabled children on their siblings or the potential of siblings as therapists, this book will be the key. No other book covers the recent research in this important topic and discusses the clinical issues in depth and in practical terms. For more than two decades, this work has remained the leading advanced textbook and easy-to-use reference on food chemistry and technology. Its fourth edition has been extensively re-written and enlarged, now also covering topics such as BSE detection or acrylamide. Food allergies, alcoholic drinks, or phytosterols are now treated more extensively. Proven features of the prior editions are maintained: Contains more than 600 tables, almost 500

figures, and about 1100 structural formulae of food components - Logically organized according to food constituents and commodities - Comprehensive subject index. These features provide students and researchers in food science, food technology, agricultural chemistry and nutrition with in-depth insight into food chemistry and technology. They also make the book a valuable on-the-job reference for chemists, food chemists, food technologists, engineers, biochemists, nutritionists, and analytical chemists in food and agricultural research, food industry, nutrition, food control, and service laboratories. From reviews of the first edition "Few books on food chemistry treat the subject as exhaustively...researchers will find it to be a useful source of information. It is easy to read and the material is systematically presented." JACS Society is approaching and advancing nano- and microtechnology from various angles of science and engineering. The need for further fundamental, applied, and experimental research is matched by the demand for quality references that capture the multidisciplinary and multifaceted nature of the science. Presenting cutting-edge information that is applicable to many fields, Nano- and Micro-Electromechanical Systems: Fundamentals of Nano and Microengineering, Second Edition builds the theoretical foundation for understanding, modeling, controlling, simulating, and designing nano- and microsystems. The book focuses on the fundamentals of nano- and microengineering and nano- and microtechnology. It emphasizes the multidisciplinary principles of NEMS and MEMS and practical applications of the basic theory in engineering practice and technology development. Significantly revised to reflect both fundamental and technological aspects, this second edition introduces the concepts, methods, techniques, and technologies needed to solve a wide variety of problems related to high-performance nano- and microsystems. The book is written in a textbook style and now includes homework problems, examples, and reference lists in every chapter, as well as a separate solutions manual. It is designed to satisfy the growing demands of undergraduate and graduate students, researchers, and professionals in the fields of nano- and microengineering, and to enable them to contribute to the nanotechnology revolution.
