This guidance is an update of WHO global influenza preparedness plan: the role of WHO and recommendations for national measures before and during pandemics, published March 2005 (WHO/CDS/CSR/GIP/2005.5). Excerpt from History of the Young Men's Christian Association, Vol. 2: The Confederation Period, 1855-1861 Recent progress has made this particularly true of the Young Men's Christian Association. The world has wondered where this unheeded organization came from, where it got its ideals and methods, why it had so much enterprise and such great success with the armies, why it had the limitations it exhibited and made the blunders it did. What is its future and what function has it in the new world order? About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Maria Immacolata Maciotti's *The Buddha Within Ourselves* contains the results of a five-year study conducted by Professor Maciotti, and a team of young scholars under her direction. This study focuses on Nichiren Buddhism as practiced by the members of the Italian Soka Gakkai, one of 177 sister organizations associated with Soka Gakkai International, a well known Japan-based Buddhist association that promotes peace, culture and education all over the world. Richard M. Capozzi's translation makes this book available to English-speaking audiences, for the first time. The story of the introduction of Buddhism to China is a fascinating account of the meeting of the two great civilizations of Asia: India, the land of the Buddha's birth and the homeland of the religion; and China, where Buddhism was transformed into a world religion. Daisaku Ikeda begins with the introduction of Buddhism into China by traders and monks traveling over the Silk Route through Central Asia. After discussion the early translations of the Buddhist scriptures made by monks from Parthia and Sogdiana, the subject turns to the career and achievements of the great Kumarajiva, famed for his excellent renditions of the sutras and philosophical treatises that form the core of East Asian Buddhist literature -- among them the "Lotus Sutra". Study aids such as lists of technical terms, Buddhist texts, and proper names in Chinese, English, and Japanese make the book a useful tool for the student of Buddhism. An illuminating and well-told account of one of the most interesting chapters of world religious history, "The Flower of Chinese Buddhism" is a valuable contribution to the field. -- From publisher's description. Special edition of the Federal Register, containing a codification of documents of general applicability and future effect ... with ancillaries. This is a study of the interrelationship between the history of the Christian Church in England and England's social history during the period of transition from medieval to modern society. This book examines one region of north-eastern Gaul around Metz in the period between the end of the Roman Empire and the accession of Charlemagne. It adopts a new, multi-disciplinary approach using all available evidence, both documentary and archaeological. It deals with a broad range of historical themes, and, by looking at the reasons behind the creation of different forms of evidence, it examines how the different facets of social organisation (ethnicity, gender, age and social hierarchy) were related intimately to each other and to contemporary settlement patterns of the region. As a result, it is argued that the Merovingian period was not one of slow 'transformation' from 'Roman' to 'medieval' but was one of constant, dynamic social change and diversity even between the recognised periods of dramatic upheaval. We develop computationally efficient iterative algorithms for finding the Maximum Likelihood estimates of the delay and spectral parameters of noise-like Gaussian signal radiated from a common point source and observed by two or more spatially separated receivers. We first consider the stationary case in which the source is stationary (not moving) and the observed signals are modeled as wide sense stationary processes. We then extend the scope by considering a non-stationary (moving) source radiating a possible non-stationary stochastic signal. In that context, we address the practical problem of estimation given discrete-time observations. We also present efficient methods for calculating the log-likelihood gradient (score), the Hessian, and the Fisher's information matrix under stationary and non-stationary conditions. Keywords: Array processing, Estimate maximize algorithm. (kr). This three-volume study examines the questions raised by the performance of the military institutions of France, Germany, Russia, the United States, Great Britain, Japan and Italy in the period from 1914 to 1945. Leading military historians deal with the different national approaches to war and military power at the tactical, operational, strategic, and political levels. They form the basis for a fundamental re-examination of how military organizations have performed in the first half of the twentieth century. Volume 2 covers the interwar period. Volumes 1 and 3 address World War I and World War II, respectively. Now in a new edition, with a new introduction by the editors, these classic volumes will remain invaluable for military historians and social scientists in their examination of national security and military issues. They will also be essential reading for future military leaders at Staff and War Colleges. The concept of time is a crucial filter through which we understand any events or phenomena; nothing exists outside of time. It conditions not only the question of 'when', but also influences the 'what, how and why' of our ideas about management. And yet management scholars have rarely considered this 'temporal lens' in understanding how time affects employees at work, or the organizations for which they work. This 2-volume set provides a fresh, temporal perspective on some of the most important and thriving areas in management research today. Volume 1 considers how time impacts the individual, and includes chapters on identity, emotion, motivation, stress and creativity. Volume 2 considers time in context with the organization, exploring a temporal

understanding of leadership, HRM, entrepreneurship, teams and cross-cultural issues. There is an overall concern with the practical implications of understanding individuals and organizations within the most relevant timeframes, while the two volumes provide an actionable research agenda for the future. This is a highly significant contribution to management theory and research, and will be important reading for all students and researchers of Organizational Behavior, Organizational Psychology, Occupational Psychology, Business and Management and HRM. Trieste Publishing has a massive catalogue of classic book titles. Our aim is to provide readers with the highest quality reproductions of fiction and non-fiction literature that has stood the test of time. The many thousands of books in our collection have been sourced from libraries and private collections around the world. The titles that Trieste Publishing has chosen to be part of the collection have been scanned to simulate the original. Our readers see the books the same way that their first readers did decades or a hundred or more years ago. Books from that period are often spoiled by imperfections that did not exist in the original. Imperfections could be in the form of blurred text, photographs, or missing pages. It is highly unlikely that this would occur with one of our books. Our extensive quality control ensures that the readers of Trieste Publishing's books will be delighted with their purchase. Our staff has thoroughly reviewed every page of all the books in the collection, repairing, or if necessary, rejecting titles that are not of the highest quality. This process ensures that the reader of one of Trieste Publishing's titles receives a volume that faithfully reproduces the original, and to the maximum degree possible, gives them the experience of owning the original work. We pride ourselves on not only creating a pathway to an extensive reservoir of books of the finest quality, but also providing value to every one of our readers. Generally, Trieste books are purchased singly - on demand, however they may also be purchased in bulk. Readers interested in bulk purchases are invited to contact us directly to enquire about our tailored bulk rates. This is the first full-length institutional study of the organization and functions of the Imperial Household Department under Ch'ing rule. That department constituted the emperor's 'personal bureaucracy.' In tracing the complex structure of this organization, Preston Torbert has avoided an exhaustive listing of nominal offices and their prescribed duties; instead, he has described the distinctive 'social groups' that made up the departments total personnel-the bondservants, the eunuchs, and the palace maids. This study explores the influence of culture on the requirements for a Revolution in Military Affairs (RMA). It assesses how cultural factors at the strategic and the U.S. Army organizational levels may affect the changes required for realizing an RMA. Defined as a paradigmatic shift in the conduct of military affairs spurred by the confluence of organizational change with new and existing technologies and concepts of operations, the RMA has long been a controversial analytical construct. This thesis accepts the premise that the history of warfare can be interpreted as a series of RMAs. It explores the complex and powerful influence of American strategic culture and the organizational culture of the U.S. Army on the organizational, doctrinal, technology, funding and other factors vital to the realization of an RMA. The study compares the influence of U.S. strategic and Army organizational culture on the RMA during the interwar period (1919-1941) and the contemporary period (since the 2011 withdrawal of U.S. combat forces from Iraq) to highlight similarities and differences that U.S. military and civilian leaders can learn from to change the paradigm of military affairs in America's favor. This compilation includes a reproduction of the 2019 Worldwide Threat Assessment of the U.S. Intelligence Community. I. INTRODUCTION * A. RESEARCH INQUIRY * B. RESEARCH CHALLENGES * C. Leadership and Organizational Culture transforms the abstract concept of culture into a tool that can be used to better shape the dynamics of organization and change. This updated edition focuses on today's business realities. Edgar Schein draws on a wide range of contemporary research to redefine culture and demonstrate the crucial role leaders play in successfully applying the principles of culture to achieve their organizational goals. From the ill-fated dot-com bubble to unprecedented merger and acquisition activity to scandal, greed, and, ultimately, recession -- we've learned that widespread and difficult change is no longer the exception. By outlining the process organizations have used to achieve transformational goals and by identifying where and how even top performers derail during the change process, Kotter provides a practical resource for leaders and managers charged with making change initiatives work.
