Some Aspects of Petroleum Product Price Adjustment in the Context of Fund Programs, 1980-1982 Aug 25 2022 This paper reviews adjustment in oil imports and domestic pricing policies affecting petroleum under Fund-supported programs. The adjustment of countries with Fund-supported programs (during 1980–82) following the two oil price shocks is compared with that of the nonprogram countries, to evaluate the impact of the Fund's decision to emphasize adjustment after 1979–80 as opposed to providing more financing after 1973–74. The relatively stronger adjustment to the second oil price shock, by program countries underpinned by evidence of adoption of important petroleum pricing policies and support measures in a program context, provides evidence that the Fund contributed to the adjustment and energy conservation effort.

Beberapa Pemikiran Mengenai Pembangunan Industri Gas Bumi Indonesia Some Thoughts On Indonesian Natural Gas Industry Development Dec 05 2020 Industri gas bumi memiliki peranan yang penting dalam ekonomi Indonesia, sebagai penyumbang pendapatan ekspor serta APBN Indonesia. Gas bumi adalah sumber energi yang bersih, yang akan digunakan di Indonesia sampai jauh ke depan mengingat Indonesia memiliki cadangannya dalam jumlah cukup besar. Namun pengembangan industri gas bumi Indonesia belum optimal, khususnya bagi kepentingan domestik, terlihat misalnya dari pembangunan infrastruktur gas bumi yang sangat terlambat sementara permintaannya terus membesar. Buku ini menjelaskan teori maupun praktik pembangunan industri gas bumi, yang akan berperan penting dalam penyediaan energi di Indonesia ke depan. Buku ini merupakan buku langka mengenai pembangunan industri gas bumi Indonesia, ditulis oleh penulis yang tidak saja memahami konsep pembangunannya secara teori, namun juga memiliki pengalaman panjang dan perspektif luas dalam perencanaan pembangunan industri energi yang akan berperan penting dalam penyediaan energi Indonesia ke depan. Harapan penulis buku ini akan bermanfaat bagi mahasiswa, dosen, pegawai pemerintah maupun kalangan swasta yang bergerak di bidang pembangunan industri gas bumi dan energi di Tanah Air. Beberapa Pemikiran Mengenai Pembangunan Industri Gas Bumi Indonesia Some Thoughts On Indonesian Natural Gas Industry Development ini diterbitkan oleh Penerbit Deepublish dan tersedia juga dalam versi cetak.

Competition Aspects of Access Pricing Dec 29 2022 "The question which this report addresses is how the Commission should seek to ensure the success of initiatives taken with a view to liberalising the network industries. In other words, the key question is not 'how should a regulatory authority establish network access prices within the framework of its own particular objectives and institutional arrangements?' but 'within the framework of European competition law, how should the Commission take a view as to whether a particular set of network access prices is anti-competitive?'"--Introduction.

Transfer Pricing Aspects of Intra-Group Financing Nov 27 2022 For corporate managers, maximization of the profits and the market value of the firm is a prime objective. The logical working out of this principle in multinational enterprises has led to an intense focus on transfer pricing between related companies, principally on account of the very attractive tax advantages made possible. Inevitably, numerous countries have established transfer pricing legislation designed to combat the distortions and manipulations that are inherent in such transactions. This important book, one of the first in-depth analysis of the current worldwide working of transfer pricing in intra-group financing and its resonance in law, presents the relevant issues related to loans, financial guarantees, and cash pooling; analyses an innovative possible approach to these issues; and describes new methodologies that can be implemented in practice in order to make intra-group financing more compliant with efficient corporate financing decisions and the generally accepted OECD arm's length principle. Comparing the tax measures implemented in the corporate tax law systems of forty countries, this study investigates such aspects of intra-group financing as the following: – corporate finance theories, studies, and surveys regarding financing decisions; – application of the arm's length principle to limit the deductibility of interest expenses; – impact of the OECD's Base Erosion and Profit Shifting (BEPS) project; – transfer pricing issues related to intra-group financing; – credit risk in corporate finance; – rationales utilized by credit rating agencies; and – the assessment of arm's length nature of intra-group financing. The author describes ways in which the application of the arm's length principle can be strengthened and how the related risk of distortion and manipulation can be minimized. The solutions and methodologies proposed are applicable to any business sector. Given that determination of the arm's length nature of transactions between related companies is one of the most difficult tasks currently faced by taxpayers and tax administrations around the world, this thorough assessment and analysis will prove extraordinarily useful for in-house and advisory practitioners, corporate officers, academics, international organizations, and government officials charged with finding effective responses to the serious issues raised. In addition to its well-researched analysis, the book's comparative overview of how loans, financial guarantees, and cash pooling are currently addressed by OECD Member States and by their national courts is of great practical value in business decision making.

Nonlinear Pricing Sep 13 2021 What do phone rates, frequent flyer programs, and railroad tariffs all have in common? They are all examples of nonlinear pricing. Pricing is nonlinear when it is not strictly proportional to the quantity purchased. The Electric Power Research Institute has commissioned Robert Wilson to review the various facets of nonlinear pricing. The work starts with a general non-mathematical discussion, followed by a more technical presentation intended for readers with a fairly advanced background. Thorough and detailed, this study has ample examples of case studies from a variety of industries.

Economic Tendencies in the United States May 10 2021

Fundamentals of International Transfer Pricing in Law and Economics Oct 27 2022 The taxation of multinational corporate groups has become a major concern in the academic and political debate on the future of international taxation. In particular the arm's length standard for the determination of transfer prices is under increasing pressure. Many countries and international bodies are now taking a closer look at the use of transfer prices for profit shifting and are exploring alternative mechanisms such as formulary apportionment for the allocation of taxing rights. With regard to this topic, this volume is the first to offer a concise analysis of transfer pricing in the international tax arena from an interdisciplinary legal and economic point of view. Fundamentals such as the efficient allocation of resources within multi-unit firms and distortions between different goals of transfer pricing as well as different aspects of it in tax and corporate law, the traditional OECD approach and practical aspects concerning intangibles, capital and risk allocation are covered by outstanding authors.

A Behavioral Approach to Asset Pricing Aug 01 2020 Behavioral finance is the study of how psychology affects financial decision making and financial markets. It is increasingly becoming the common way of understanding investor behavior and stock market activity. Incorporating the latest research and theory, Shefrin offers both a strong theory and efficient empirical tools that address derivatives, fixed income securities, mean-variance efficient portfolios, and the market portfolio. The book provides a series of examples to illustrate the theory. The second edition continues the tradition of the first edition by being the one and only book to focus completely on how behavioral finance principles affect asset pricing, now with its theory deepened and enriched by a plethora of research since the first edition

Transfer Pricing Aspects of Real Estate Financing Sep 25 2022 There has been a lot of interest in the transfer pricing of intercompany loans recently, especially following the new guidance released by the OECD on financial transactions in February 2020. However, there are no specific details on the financing of real estate in this new guidance, although in practice the financing of real estate has some unique characteristics. In this article, the authors highlight several aspects that are specific to real estate financing and their impact on transfer pricing. The focus is mainly on investments by multinational enterprises in commercial real estate (CRE), i.e. income-producing property used solely for business purposes, rather than residential property. Examples of CRE include retail malls, shopping centres, office buildings and hotels.

Aspects of the Marketing and Pricing of Motor Spirit Apr 28 2020

Pricing and Revenue Optimization Feb 16 2022 This is the first comprehensive introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of "yield management" in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of

mathematical analysis to optimize pricing has become increasingly important across many different industries. But, since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in their courses. For access to the solutions manual, please contact marketing@www.sup.org.

Prices and Production Nov 15 2021

Government Publications Jan 24 2020 Government Publications: Key Papers is a compilation of papers that covers various topics related to government publications. The book presents materials drawn from a variety of sources, such as public domains, book chapters, and periodicals from different countries. The text contains 61 chapters organized into 15 parts; each part covers a specific area, such as sorting and labeling of publications, library systems, reference services, and municipal and state publications. The book dedicates several parts to British, Canadian, and Australian publications. This book will be of great value to individuals who have an interest in government information.

The Price is Wrong Jan 30 2023 Fair pricing is an issue that affects us all, whether we're consumers or merchants. Throughout her career, Sarah Maxwell has seen how pricing practices across a variety of different areas, from mobile phones and airline tickets to prescription drugs and gasoline, impact our everyday lives. Now, with *The Price Is Wrong*, Maxwell shares her deepest insights on this issue and examines both the psychological and sociological basis of fair pricing.

Behavioral and Psychological Aspects of B2B Pricing Jul 12 2021

Price Management Feb 28 2023 In this book, the world's foremost experts on pricing integrate theoretical rigor and practical application to present a comprehensive resource that covers all areas of the field. This volume brings together quantitative and qualitative approaches and highlights the most current innovations in theory and practice. Going beyond the traditional constraints of "price theory" and "price policy," the authors coined the term "price management" to represent a holistic approach to pricing strategy and tactical implementation. They remind us that the Ancient Romans used one word, *pretium*, to mean both price and value. This is the fundamental philosophy that drives successful price management where producer and customer meet. Featuring dozens of examples and case studies drawn from their extensive research, consulting, and teaching around the world, Simon and Fassnacht cover all aspects of pricing following the price management process with its four phases: strategy, analysis, decision, and implementation. Thereby, the authors take into account the nuances across industry sectors, including consumer goods, industrial products, services, and trade/distribution. In particular, they address the implications of technological advancements, such as the Internet and new measurement and sensor technologies that have led to a wealth of price management innovations, such as flat rates, freemium, pay-per-use, or pay-what-you-want. They also address the emergence of new price metrics, Big Data applications, two-sided price systems, negative prices, and the sharing economy, as well as emerging payment systems such as bitcoin. The result is a "bible" for leaders who recognize that price is not only a means to drive profit in the short term, but a tool to generate sustained growth in shareholder value over the longer term, and a primer for researchers, instructors, and students alike. Praise for *Price Management* "This book is truly state of the art and the most comprehensive work in price management." - Prof. Philip Kotler, Kellogg School of Management, Northwestern University "This very important book builds an outstanding bridge between science and practice." - Kasper Rorsted, CEO, Adidas "This book provides practical guidelines on value creation, communication and management, which is an imperative for businesses to survive in the coming era of uncertainty." - Dr. Chang-Gyu Hwang, Chairman and CEO, KT Corporation (Korea Telecom)

Business Aspects of Pricing Under the Robinson-Patman Act Apr 20 2022

Total Revenue Management (TRM) May 29 2020 This book explores total revenue management (TRM), an emerging concept in revenue management that incorporates existing principles and tools of revenue management across all profit streams. It is a professional's guide to using TRM in an optimal and innovative manner to gain competitive advantage. Readers will gain comprehensive insights into the strategies, tools and principles of TRM including existing and emerging revenue streams across the value chain. The author offers a transparent and holistic explanation of pricing strategies, segmentation methods and distribution principles which enable implementation of TRM in organizations.

Transfer Pricing for Multinational Enterprises. An Integrated Approach Apr 08 2021 Diploma Thesis from the year 2003 in the subject Business economics - Accounting and Taxes, grade: 2,0 (B), Schmalkalden University of Applied Sciences (Economics), course: Cost Pricing und Controlling, 121 entries in the bibliography, language: English, abstract:

Globalization of business has replaced the concept of national exchanges with global transactions. Consequently, the changes due to globalization play a big role in the strategy of multinational enterprises. The volume of intrafirm trade is huge and expanding rapidly as multinationals globalize their investment and trade. Today, a considerable proportion of world trade takes place within multinational enterprises. This indicates the importance of transfer pricing conspicuously. The intention of this book is to describe the challenge of transfer pricing holistically and to exhibit some options for multinational enterprises determining their transfer prices. While management accounting as well as strategic aspects of transfer prices are also relevant for enterprises, which are not multinational, external aspects (specifically tax accounting) are typically only crucial for multinationals. This book is an attempt to integrate all aspects of transfer pricing targeting practitioners as well as economists.

Marketing Financial Services Aug 13 2021 Within a practical business context of the changing, competitive climate, this book details the implications for marketing strategy. New chapters cover topics such as credit cards and customer care, while several relevant case studies have also been added. Combining analysis of principles, concepts and techniques with sound practical advice, 'Marketing Financial Services' is ideal for students on degree and postgraduate courses, including Chartered Institute of Bankers. There is also a tutor resource pack to accompany the case studies in this textbook.

Entrepreneurial Marketing Dec 25 2019 One key for success for an entrepreneur is to obtain sales (revenue) and profits as quickly as possible upon launching the venture.

Entrepreneurial Marketing focuses on this and the essential elements of success in order to achieve these needed sales and revenues and then grow the company. The authors build a comprehensive, state-of-the-art picture of entrepreneurial marketing issues, providing major theoretical and empirical evidence that offers a clear, concise view of the field. Through an international approach that combines both theoretical and empirical knowledge on entrepreneurship and marketing, this book informs and enhances an entrepreneurs' creativity, their ability to bring innovations to the market and their willingness to face risk and change the world. Key components addressed include: identifying and selecting the market, determining the consumer needs cost-effectively, executing the basic elements of the marketing mix (product, price, distribution, and promotion) and competing successfully in the domestic and global markets by implementing a sound marketing plan. Numerous illustrative examples bring the content to life. The mix of theoretical content, examples, empirical analyses and case studies, make this book an excellent resource for students, professors, researchers, practitioners, and policymakers all over the world.

Federal Acquisition Circular Nov 23 2019

The Theory of Industrial Organization Mar 27 2020 The Theory of Industrial Organization is the first primary text to treat the new industrial organization at the advanced-undergraduate and graduate level. Rigorously analytical and filled with exercises coded to indicate level of difficulty, it provides a unified and modern treatment of the field with accessible models that are simplified to highlight robust economic ideas while working at an intuitive level. To aid students at different levels, each chapter is divided into a main text and supplementary section containing more advanced material. Each chapter opens with elementary models and builds on this base to incorporate current research in a coherent synthesis. Tirole begins with a background discussion of the theory of the firm. In Part I he develops the modern theory of monopoly, addressing single product and multi product pricing, static and intertemporal price discrimination, quality choice, reputation, and vertical restraints. In Part II, Tirole takes up strategic interaction between firms, starting with a novel treatment of the Bertrand-Cournot interdependent pricing problem. He studies how capacity constraints, repeated interaction, product positioning, advertising, and asymmetric information affect competition or tacit collusion. He then develops topics having to do with long term competition, including barriers to entry, contestability, exit, and research and development. He concludes with a "game theory user's manual" and a section of review exercises. Important Notice: The digital edition of this book is missing some of the images found in the physical edition.

Computational Aspects of Combinatorial Pricing Problems Jun 30 2020

Price Setting and Price Regulation in Health Care Jan 06 2021 The objectives of this study are to describe experiences in price setting and how pricing has been used to attain better coverage, quality, financial protection, and health outcomes. It builds on newly commissioned case studies and lessons learned in calculating prices, negotiating with providers, and monitoring changes. Recognising that no single model is applicable to all settings, the study aimed to generate best practices and identify areas for future research, particularly in low- and middle-income settings. The report and the case studies were jointly developed by the OECD and the WHO Centre for Health Development in Kobe (Japan).

Pricing, Online Marketing Behavior, and Analytics Sep 01 2020 Over the past few decades marketing practices have shifted with the sudden growth of social media and the proliferation of devices, platforms, and applications. This rapidly changing environment presents new opportunities and challenges for marketers, who need to stay up to date with the development of e-marketing. Viglia instructs readers in the theories and practices of online marketing, detailing the characteristics, consumer behaviors, and differences between platforms, analytics, and pricing strategies of new media. *Pricing, Online Marketing Behavior, and Analytics* covers many different aspects of how online marketing works and its continuous evolution. Case studies and examples are used throughout the book to outline theories and explain e-marketing characteristics in a practical way.

Intermediate Microeconomics Oct 22 2019 As well as providing a thorough treatment of the key elements of price theory for second-year students of microeconomics, this textbook also presents a distinctive perspective on the material, embedding these elements in a sustained analytical argument linking price theory to the study of industry.

Technical Bulletin - University of Arizona, Agricultural Experiment Station Nov 03 2020

Cost Project of Rose Water of the Rosense Company May 22 2022 Project Report from the year 2017 in the subject Business economics - Miscellaneous, grade: 1,3, language:

English, abstract: The present work introduces the company Rosense, which produces rosewater for the purpose of beauty and skincare. The first part is about theoretical aspects of pricing, in which key words are explained and described. This is followed by the methodology with the main focus on the break-even analysis as well as pricing structure. During the practical part of the work the company's profile is presented in which the legal form of the organization, economic activity as well as the product group are discussed. This is followed by a brief description about the focused product and its operating industry market, where the industry and market type, business competitors and their market shares are identified. The company's goals of pricing in connection with the analysis of the factors that influence price decisions, the BtoB price under EXW conditions and BtoC/selling price for a customer/end-user of the product are calculated in the following chapter. Finding a break-even point using a break-even method is being explained in the fifth chapter. The work will be finalized with existing or possible company's pricing strategies for e.g. discounts or pricing features in the sixth chapter as well as a conclusion, in which future perspectives are cited and evaluated.

The Transfer Pricing Problem Dec 17 2021 Author explores the transfer pricing policies. On the beginning, he identifies the elements of administrative process that are crucial for managing the transfer pricing in corporate practice. Furthermore, he examines the management challenges of the most common transfer pricing policies. Finally, he presents general framework for strategy implementation that is designed to help managers to analyse their own company transfer pricing practices.
